Javascript

Node.js

PostgreSQL

MySQL

AWS, GCP

MongoDB

Angular

React

Nest.JS

Next.js

PROFILE

Highly motivated and results-oriented Lead Backend Engineer with 5+ years of experience in building and deploying scalable web applications. Proven track record of leading project teams, driving innovation, and achieving significant improvements in customer engagement, system performance, and code quality. Skilled in a wide range of technologies including Node.JS, React, Angular, cloud platforms (AWS, GCP), and CI/CD pipelines.

EMPLOYMENT HISTORY

Lead Backend Engineer at NeoITO, Trivandrum

January 2021

As Lead backend engineer, I lead the development team for different projects, lead the development activities, mentor new members and juniors, and design web application architecture including database and cloud infrastructure. I also contribute to development as a full-stack developer with a focus on backend. I write microservices and API endpoints (REST and GraphQL), CI/CD workflows, and code infrastructure using Terraform.

I have some organisational responsibilities as well. I am part of the technical core team in which we make organization-wide technical decisions and develop strategies, decide and enforce coding standards and develop and maintain Playbook for development.

I work with the Talent Acquisition Team to help with hiring by taking interviews and preparing questionnaires.

Backend Engineer at NeoITO, Trivandrum

January 2020 — January 2021

As a backend developer, I design and develop solutions using Node.JS backend technologies and cloud technologies in GCP and AWS. I work with multiple teams and write code, containerize them if needed and deploy them onto cloud infrastructure. I create Kubernetes cluster and services and write Kubernetes configuration files and deploy them.

Software Engineer at NeoITO, Trivandrum

June 2019 — January 2020

Full stack engineer develops front end and functionality using Angular, NgRx for state management, develops REST API endpoints using express and GCP Firebase cloud functions, and integrates them to the Angular application.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY, SCTCE, Trivandrum

June 2015 — May 2019

★ PROJECT EXPERIENCE

○ Metrics AI: A developer performance analysis AI Platform.

- Engineered an advanced data pipeline, backend, and analysis infrastructure using Apache Airflow, AWS, API Gateway.
- ECS, AWS SQS, and PostgreSQL; enhanced analytics capabilities.
- Formulated and implemented advanced CI/CD pipelines with SonarQube for code analysis, improving build stability and reducing integration errors by 60%, leading to more reliable product releases.
- Led the development, product design, and sales activities, driving a 70% improvement in user engagement.

○ From The Farm: E-commerce application for meat farms.

- Orchestrated development, cloud architecture, and database design for an e-commerce app; harnessed.
- AWS services to increase scalability and availability.
- Converted manual infrastructure management processes to automated Terraform scripts, reducing deployment time by 40%.
- Composed reusable components, and built B2B and B2C applications using React and Next.js. Created
- REST APIs and GraphQL endpoints using NestJS.
- Used Kafka for streaming events data and to send notifications.

○ Daily AI: A CRM for mortgage professionals.

- Progressed from Frontend Developer to Lead Engineer at Daily AI, focusing on Angular, NgRx, and RxJS for high-powered web applications.
- Leveraged GCP cloud technologies, including Firebase Firestore, Cloud Functions, and Dialogflow.
- Reengineered infrastructure and launched containerized applications on Kubernetes using GKE and Cloud Run; reduced deployment times by 40% and improved system scalability by 30%.
- Created a robust drip campaign solution with complex scheduling, seamlessly attachable into any CRM workflow, using Pub/Sub, Twilio, SendGrid, Gmail API, and Outlook API.
- Used OAuth and encrypted JWTs to call Microsoft Graph APIs and Gmail APIs.
- Authored REST APIs and microservices using Node.js, Express, and MongoDB.
- Engineered advanced ETL pipelines to integrate third-party integration and loan origination systems,
- Enabling real-time processing of over 50 thousand mortgage records monthly, reducing data errors by 15%.

★ ADDITIONAL INFORMATION

○ Technical Skills

Javascript, Typescript, Node.JS, AWS, GCP, Docker, Kafka, SQS, Pub/Sub, Kubernetes, Express, Nest JS, GraphQL, REST API, Airflow, React, Angular, Next.JS, MongoDB, TSLint, PostgreSQL, MySQL, Firestore, Terraform, JIRA, Github, GitLab, Bitbucket, CI/CD, Jenkins, SonarQube, Redhat 3Scale, AWS API Gateway

○ Languages

Fluent in Malayalam (native), and English; Conversational Proficiency in Tamil and Hindi.

○ Achievements

“Coding Ninjas” - Competitive Coding, Top Performer.
