Education

Indian Institute of Technology Bhubaneswar

B.Tech. IN COMPUTER SCIENCE

Khordha, Odisha

July 2016 - July 2020

- Technology/Tools: AWS, Microservice, Kafka, MySQL, SumoLogic, Grafana, Coralogix, OpenTracing
- Languages: Golang, PHP, SQL, C++, C, Python

Experience

BYJU'S

SENIOR SOFTWARE DEVELOPER

Bengaluru, Karnataka

Aug 2022 – Now

- **Designed** and **Built** the new core **Microservice** for one of BYJU'S high-demanded products. This service faces a high request load and is also equipped with all the latest **logging** and **tracing** methods.
- **Designed** and **Implemented** the entire backend **Architecture** for the development of our in-house **Mobile Device Management** service. The development includes a new **Microservice**, a new **Admin Dashboard**, **Kafka** integration, a bunch of **APIs** exposed to the device and deployment on the **AWS EC2** cluster.
- **Implemented** and **Delivered** a feature which creates a **Mobile Device Management** profile at our third-party vendor and handles all user **Subscriptions** on our end.
- **Implemented** and **Delivered** **Grade Config** which helps devices decide which all apps to enable for a user based on their grade and subscriptions. As this feature is very critical that's why we ensured **high Availability** and **Low Latency**.
- **Designed, Implemented** and **Delivered** a backend feature which tells the device when to switch to the next grade.
- **Worked** on integration of **Haptic ChatBot** with logging feature to personalize the experience on one of our websites to reduce the load on our customer support.
- Built multiple **metrics visualisation dashboards** for monitoring our **microservice availability** and configured multiple availability dips and critical failure **alerts** to help our team achieve better availability using Grafana and Coralogix.
- **Guided** and **Managed** junior engineers on task assignments and helped them ramp up.

Razorpay

SOFTWARE DEVELOPER

Bengaluru, Karnataka

Aug 2020 – Aug 2022

- **Designed, Implemented** and **Delivered** the backend of the project which enabled users to apply for a **Current Account** from the user dashboard and track their application progress.
- **Designed, Implemented** and **Delivered** a project which enabled the Bank to **refer** their customers to our platform via **APIs** and let users continue to our platform without any onboarding huddles.
- **Designed** and **Implemented** **CA Lead Management System** for our Partner Bank to improve the overall TAT of opening and activating a Current Account.
- **Designed, Implemented** and **Delivered** a **Slot Booking System** which helps users to book slots for verification and also built the **Call Logging System** which enabled our operation's people to better connect with customers.
- Worked on user **document verification** by integrating with an **external microservice** and **delivering updates** of the Current Account application to stakeholders via mail using Hubspot as workflow configuration and automated emails.
- **Solved** and **implemented** a tricky **problem of Serviceability** by a bank for Current Accounts by utilizing **Google Map Geolocation API** and Geometrical logic.
- Contributed to the development of a project which helped users to **link** their **Current Accounts** to our platform.
- Completed **Designing** for the **Auto-Fill functionality** which helped users auto-filling the Current Account application.
- Contributed to the Org with **hiring interviews** and helped new engineers in **onboarding and ramping up**.

GEP Worldwide

SOFTWARE ENGINEERING INTERN

Mumbai, Maharashtra

May 2019 - July 2019

- Did POC on Elasticsearch for all the functionalities used by the company for reporting on top of SQL Database.
- Implemented Parser which converts the ES output into Tabular Format and Dynamic Query Builder for Elasticsearch.

Achievements

- Won the **Edison of RazorpayX** title for fast, efficient and quality-focused development while working at Razorpay.
- Won the first prize at **Smart India hackathon 2019** for Cisco's problem statement.
- Qualified for 3rd round in the annual multi-round **global programming tournament** conducted by CodeChef.
- 2nd in **Short Film making competition** at IIT Roorkee, 4th in **Documentary making competition** at IIT KGP.

Extra-curricular Activities

- Have an interest in reading about new technologies and books on Entrepreneurship.
- Hobbies include watching Sci-Fi Movies/Series and PC Gaming.
