Objective

3.5 Years of IT industry experience encompassing a wide range of skill set, roles & responsibilities. Seeking a position in a reputed organization which will help me deliver my best and upgrade my skills and meet the demands of the organization.

Skilled Software Development Engineer with expertise in Automation and Manual testing of mobile and web applications, as well as API testing, seeking a challenging role to contribute to the development of cutting-edge software solutions.

Key Skills:

1. Manual Testing
2. Automated Testing (Appium, Selenium, Java)
3. Mobile Application Testing (Android & iOS)
4. Web Application Testing
5. API Testing
6. Regression Testing
7. User Acceptance Testing
8. Bug Tracking & Reporting
9. Test Planning & Strategy
10. Cross-Browser Testing

Tools:

JIRA | Click Up | GitHub | Android Studio | Cucumber Studio | Appium inspector | Postman

Technical Skills:

LANGUAGES: Core JAVA, HTML, TestNG, Appium, Selenium

OFFICE TOOLS: Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Work Experience (3.5 years)

QA AUTOMATION ENGINEER | MYTEAM11 SPORTS FANTASY | SINCE JAN 2021

Core Responsibilities:

1. Performed manual and automation testing of mobile and web applications, ensuring the delivery of high- quality software products.
2. Developed and executed comprehensive test cases, covering User Acceptance Testing, Functional Testing, and Regression Testing.
3. Conducted thorough API testing to validate functionality, data exchange, and adherence to API specifications.
4. Automated testing procedures for Myteam11 Android & iOS applications using Appium with Java, resulting in improved testing efficiency and faster release cycles.

5. Collaborated with cross-functional teams to identify and resolve defects, ensuring a smooth user experience and optimal application performance.

Skills:

- User Acceptance Testing (UAT): Conducting tests to ensure that the application meets the requirements and expectations of end-users. Validating that the software is ready for release to customers.
- Functional Testing: Verifying that each function of the application performs correctly and according to specifications. Identifying and reporting any functional defects or inconsistencies.
- Regression Testing: Repeating tests on modified or updated software to ensure that existing functionality has not been negatively affected. Catching and fixing new defects that might have been introduced during development or updates.
- UI Testing: Testing the user interface of the application to ensure it is visually appealing, responsive, and user-friendly. Verifying that the UI elements function as intended and align with design guidelines.
- API Testing: Testing the application's API (Application Programming Interface) to validate its functionality and integration with other systems. Verifying that the API responses are accurate and consistent.
- Games Testing: Assuring the quality of games and their functionalities within the application. Identifying and reporting any issues related to the gaming experience.

Language and Framework: Java | TestNG | Appium | Selenium

Tool and Environment: JIRA | Click Up | GitHub | Android Studio | Cucumber Studio | Appium inspector | Postman.

SOFTWARE TESTER | ASKME TCHONOLGIES | JUN 2020 - DEC 2020

Core Responsibilities:

1. Report bugs and errors to development teams.
2. Execute test cases and analyse results.
3. Create logs to document testing phases and defects.
4. Interacted and discussed with developer team regarding defects and helped troubleshoot issues.

Tool and Environment: JIRA | GitHub | Postman.

Education:

B-TECH – INFORMATION TECHNOLOGY | VIT Campus Jaipur | 2010-2014
