WORK EXPERIENCE

Portfolio Manager

Happay - Expense Management Business Solution (Cred)

April 2021 - May 2023

Bengaluru

- I onboarded 1500+ corporate clients successfully across all products (Petty Cash, Fleet Xpress, Flexi Benefits, and Payroll) and made sure that every quarter saw a strong increase in multiple portfolio matrices
- Every quarter, I personally managed a portfolio worth 200cr, constantly generating solid returns and managing all interactions with clients, channel partners (HDFC), and other stakeholders.
- I took part in cross-functional stakeholder meetings to help the onboarding process be improved and bring about customer happiness.
- Working closely with the sales team and product team matrices data, we were able to manage the portfolio with better productivity.
- To drive the portfolio successfully, I managed several projects at once. I also educated interns and provided them with sufficient product expertise to ensure their team contribution
- Was able to manage the entire Easter and South Zone portfolio by me and produced the results in a remarkably short time.
- Shared customer feedback and requirements with the tech team in order to enhance product functionality and user experience.
- I personally managed a portfolio of large clients, constantly providing superior service and promptly and effectively resolving their problems.
- Have weekly calls with all the important authorities like Zonal Heads, Managers, and Sales teams to create better development of the product
- The government of Andhra Pradesh, ITC Global Infotech, Page Industries, Apollo Chain of Companies, Mercedes, Cerner Health Care Solutions, CBA Services Pvt Ltd etc. are a few personally handled organizations.

Process Associate

Concentrix

August 2020 - March 2021

Bengaluru

Project : Telecommunication

Client : Etisalat Broadband Network

- Plan, coordinate, and keep track of the client-identified pre-implementation deliverables and process improvement activities.
- Work with other teams to manage alignment between company processes and business objectives so as to optimize business performance.
- To identify technology requirements to support company process strategy and deployment, coordinate with process owners and technology owners.
- Develop effective process vision, process strategy, and process maturation by communicating with the client.
- Create and maintain programmes for process development and optimisation. Continually update and maintain the documentation of process flows, details, and overviews.
