OBJECTIVE

Highly skilled and results-driven software developer with over 2 years of experience in designing, implementing, testing, and maintaining robust software applications. Proven ability to thrive in fast-paced environments, delivering innovative solutions. Seeking opportunities to leverage technical expertise and contribute to cutting-edge projects.

EDUCATION

Bachelor of Computer Science, Rajasthan Technical University

2018 - 2022

SKILLS

Java, JavaScript, TypeScript, SQL, HTML, CSS, NodeJs, ExpressJs, Flutter, DialogueFlow, Meteor, Docker, React.js, AngularJs, Bootstrap, React Native, SpringBoot, MongoDB, MySQL, DynamoDB, MariaDB, ElasticSearch, Git, GitHub, VS Code, Eclipse, Figma, Object-Oriented Programming (OOPS), Operating Systems (OS), Microservices, Windows, Linux.

EXPERIENCE

CarDekho

2022 - present

Software Engineer

- Spearheaded the development and maintenance of a sophisticated full-stack chatbot application, facilitating seamless cross-platform communication.
- Championed critical enhancements in the agent portal, introducing chat filters, tags, and canned responses, significantly optimizing chat management for agents.
- Elevated WhatsApp ad campaigns through the implementation of custom workflow triggers, resulting in an impressive 20
- Led the seamless integration of the WhatsApp Cloud API, reducing third-party dependencies and enhancing platform flexibility.
- Engineered an intelligent decision-making system empowering the chatbot to categorize user inquiries effectively, delivering prompt pre-defined responses and customized scenario-based workflows, thereby reducing response time.

PROJECTS

ZigChat: Architected and maintained a cutting-edge SaaS no-code Chatbot platform using **Spring Boot**, proficiently handling multiple user conversations across WhatsApp, Facebook pages, Instagram, and SMS.

Single Sign On: Conceptualized and developed a monolithic backend service with **Node.js** and **Express.js**, streamlining user access through a Unified Authentication Mechanism. Significantly reduced IT administrative workload by centralizing user account management.

Vehicle Search Bot: Engineered a highly responsive **DialogFlow** bot employing **NLP** for personalized conversational responses using **NodeJs** and **React**. Leveraged **DynamiDB** for efficient storage of contact info and responses, ensuring tailored interactions.

AWARDS & RECOGNITIONS

Dashing Debut: Acknowledged for outstanding contributions and significant impact within the initial three months of joining.
