Address

s/o nancharaiah, 4-16, salipeta, Puritigadda,
yarlagadda-(po), challapalli- md, krishana-dt.
Pin: 521126

TECHNICAL SKILLS

LANGUAGES

Python SQL
Pyspark

TECHNOLOGIES

Azure
Azure Functions Azure Data Factory Data Flows

DATABASES

SQL
Oracle Azure SQL

RAD/IDE

Visual Studio 2015/2017/2019

TOOLS

MS Office suite Git
SSMS

LANGUAGES

Telugu ,English ,Hindi

EDUCATION

PG: MCA(computers)

NNS vidya college, chirala, prakasam-dt

Percentage :77

Passout:2009

PROFESSIONAL SUMMARY

- Over all 5.3 Years of IT experience on data driven application design and development with 3.3 years of relevant hands-on- experience in various Azure data services.
- Proficient in Azure technologies such as Azure Data Factory (ADF), Azure DataBricks (ADB), Azure Synapse Analytics, Azure Active Directory, Azure Storage, Azure data Lake Services (ADLS), Azure key vault, Azure SQL DB, Azure HDInsight.
- Having good hands on experience on Azure Dev Ops (ADO) services like Repos, Boards, Build Pipelines (CI/CD), Ansible (yaml scripting) for resource orchestration and code deployment.
- Hands on Experience developing data engineering frameworks and notebooks using Azure databricks using Spark SQL, Scala, pyspark
- Experience in Apache Hadoop frame works such as Hdfs, Map Reduce, Hive etc.
- Experience in Microsoft Azure Cloud with Data Factory, LinkServices, HDI Cluster, DataLake Gen2and DataBricks.
- Good knowledge on Azure synapse Analytics.
- Proficient in Big data ingestion tools like kafka, spark streaming and sqoop for streaming and batch data ingestion.
- Worked with Big Data distributions like Hortonworks (Hortonworks 2.1) with Ambari.
- Hands-on experience in application development using Java, RDBMS, and Linux shell scripting.
- Hands-on experience working with IDE tools such as Eclipse, NetBeans and Maven.
-

PROFESSIONAL EXPERIENCE:

- Working as Azure data engineer in Novitas Technologies Private Limited 2018 to till now

PROJECT DETAILS:-

PROJECT 1:

Project	Alchemy Techsol
Description	Alchemy Techsol is a company providing AI powered Infrastructure Managed Services. Established in the year 2014, Alchemy Techsol delivers a complete suite of disruptive technologies that bring about true transformation - industry-pioneering Infrastructure Managed Services powered by AI, Machine Learning and Deep Learning; Information Security and Digital Engineering. By freeing up your time, money and resources, we help you focus on driving actual business outcomes, delighting your customers at every touch point. Alchemy Techsol's solutions are agile, measurable, replicable and unmatched. We deliver seamless business efficiency coupled with superior customer experience, driven by our domain-agnostic solutions, which find application in myriad verticals including IT, Banking, Retail and Manufacturing, amongst others. Alchemy Techsol leverages its unmatched expertise in combining Infrastructure Managed services with Artificial Intelligence, to deliver market- leading solutions for different verticals and specific customer groups. At Alchemy Techsol, we are committed to simplifying the journey of your digital transformation success – at faster turnaround times with lower costs. We believe going Digital is about racing ahead of time by going past the speed of now. Infrastructure automation does not merely speed up infrastructure management; it speeds up the entire business process and unlocks the true potential of digital transformation. In other words, your business is as good as your IT infrastructure, which bridges the gap between traditional delivery models and digitally-empowered, future-driven solutions.
Role	Azure Data engineer
Environment	■ Azure data factory ■ Azure data bricks ■ Azure sql db ■ ADLS 2

Highlights	■ Involved in ETL workflow using Azure ADF,Databricks with PySpark as per business requirements, which includes extraction of data from Relation Database and loading it to Azure Sql DB. ■ Extensively involved in writing transforming data in PySpark and pushing into ADLS Gen2. ■ Storing the resulted data into Azure SQL DB for PowerBI and Sportfire Consumption. ■ Experienced in data migration from On-Prem to Azure Cloud with Databricks using Spark api. ■ Attend daily scrum calls and update the ADO user stories on daily basis. ■ Monitor the pipeline jobs and report/fix them if any issues. ■
-------------------	--

PROJECT 2:

Project	Covalense Global
Description	Covalense Global is a Unique Digital Transformation & Enterprise Solutions company , offering future - ready solutions and superior customer experiences! We are a well-diversified, highly competent, motivated & committed group working cohesively to deliver effective solutions to organizations of varied sizes and businesses including a number of Fortune 500 companies globally. Our business operations across geographies are ably supported by our 6 development centers in India, USA, Canada, Australia, Singapore & New Zealand. We work with businesses across a broad range of industries, including Beverages, Banking & Financial Services, Education, Energy, Engineering, FMCG, Government, Healthcare, Insurance, Retail, Media & Entertainment, Technology, Telecommunications, Travel & Hospitality, and Logistics.
Role	Azure data engineer
Environment	■ PySpark, ■ python, ■ Hive, ■ databricks, ■ ADF

Highlights	▪ Developed pipelines in azure data factory to fetch data from different sources and loaded it into Azure synapse analytics ▪ Extensively involved in writing transforming data in PySpark and pushing into ADLS. ▪ Worked on Azure Devops to setup infrastructure and to build the and deploy application ▪ Implemented Incremental load strategy for loading on daily basis. ▪ Handled the releases for every deployment and the unit/integration testing. ▪ Responsible for creating Linked services, datasets, pipelines in Azure data factory. ▪ Created stored procedures using TSQL. ▪ Responsible for creating copy activity, lookup activity, Metadata activity, ▪ Monitor the pipelines are report fix the issues ▪ Creating data flows to transforming the data to Azure using Azure data factory. ▪ Developed complete framework of the project end to end and met customer's deadlines
