- Working as **Senior Software Developer** at **Emudhra**, Bangalore from 27th August 2018 to till date.

Skills Summary

Tools	NetBeans, MySQL Workbench, Postman, Eclipse, Jira, SVN, Azure DevOps, Win merge, Docker.
Domain	Trust Service - Digital Signature, DSC certificates, Timestamping

Ongoing Project:

EMDHA:

Technology: Java, Spring Boot, REST API, Hibernate, MySQL, AJAX, jQuery

Role: Senior Software Developer (Team Lead)

Location: Bangalore

Team Size: 7

Description: emdha Certification Authority (CA) is owned and managed by Baud Telecom Company (BTC) under KSA Root CA and is poised to offer Online Digital Signature Service enabling applications to seamlessly integrate and avail digital signatures in real time. It incorporates a secure and compliant digital signature methodology with online "Know Your Customer (KYC)" process of the signatory, validated against information from reliable KYC agencies.

Roles and Responsibilities:

- Responsible for User stories development, Code Review, Unit Testing, deployment of files to QA server & Preparing release objects and release procedures for client release.
- Stories development through NetBeans IDE, API testing through Postman and Version Control using SVN.
- Monitoring the deployment in Azure DevOps.
- Responsible for resolving security issues reported by **VAPT Team**.
- Responsible for solving production bugs & spikes.
- Participated in all scum ceremonies like backlog refinement, sprint planning, daily standup, and sprint retrospective meetings.
- Attend daily Product Requirement call with Product Owner (Client) and Product Manager.

eMudhra eSign:

Technology: Java, MySQL, AJAX, jQuery

Role: Software Developer

Location: Bangalore

Team Size: 5

Description: eSign Online electronic signature service, offers applications a mechanism to replace manual paper-based signatures by integrating this service within their applications. PAN Card / Aadhaar Holder can electronically sign a form/document anytime, anywhere, and on any device. eSign service facilitates significant reduction in paper handling costs, improves efficiency, and offers convenience to customers.

Roles and Responsibilities:

- Responsible for User stories development, Unit Testing, deployment of files to QA server.
- Stories development through NetBeans IDE, API testing through Postman and Version Control using SVN.
- Responsible for solving legacy and QA reported defects.
- Monitoring the deployment in JIRA.
- Responsible for solving production bugs & spikes.
- Responsible for resolving security issues reported by **VAPT Team**.
- Participated in all scum ceremonies like backlog refinement, sprint planning, daily standup, and sprint retrospective meetings.
- Attend daily Product Requirement call with BA & Onshore Developer Lead.

TSA - Timestamping:

Technology: Java, MySQL, AJAX, jQuery

Role: Junior Software Developer

Location: Bangalore

Team Size: 2

Description: Digital Time stamping is the process of securely keeping track of the creation and modification time of a document. Security here means that no one not even the owner of the document should be able to change it once it has been recorded provided that the time stamper's integrity is never compromised.

Roles and Responsibilities:

- Responsible for User stories development, Unit Testing.
- Stories development through NetBeans IDE, API testing through Postman and Version Control using SVN.
- Responsible for solving QA reported defects.
- Monitoring the deployment in JIRA.
- Responsible for solving production bugs & spikes.

- Responsible for resolving security issues reported by **VAPT Team**.
- Participated in all scum ceremonies like backlog refinement, sprint planning, daily standup, and sprint retrospective meetings.
- Attend daily Product Requirement call with Onshore Developer Lead.
