PROFESSIONAL EXPERIENCE

BUILDER.AI

Product Manager

Nov 2022 - Present

Responsible for the customer's pre-purchase journey, post-purchase journeys, infrastructure provisioning experience, Customer Catalogue Management, Builder Dial, ERP (Salesforce, Zoho) and CRM (NetSuite, Chargebee, Xero) integrations.

- Reduced the time to billing from 15 Days to under a minute by introducing new invoicing and approval workflows resulting in increased on-time payments from customers by 30% and cut manual work by 95%
- Launched event-based status updates and VM sanity checks in the user and internal dashboards for VM provisioning leading to a decrease in support turnaround time by 95% and lowered incoming support request volume by 85%
- Migrated all customer invoicing for Builder Studio from Xero to NetSuite and introduced item-level cost centre mapping and HSN-based taxation for faster and richer financial reporting.
- Launched versioning and one-click revert for all major shared data models, implemented an event-based architecture to furnish updates in all adjacent microservices and SSO for all admin panels for improved UX and performance.
- Enforced Scrum for all teams to improve visibility, product-engineering collaboration and velocity.

APRIC

Co-Founder, Product Development Head

Mar 2022 - Sept 2022

Spearheaded a team of 8 to build Apric Links (A no-code micro-site builder), Apric CMS (A Headless Content & Growth management system) and Apric Studios (A design-first product development studio) serving clients across 5 countries while being bootstrapped and profitable. We were also a part of India's No. 1 tech-product accelerator (GSF Academy - 100 startups/year)

- Helped the first 10 enterprise customers of Apric CMS improve workflow efficiency by 20% and reduce cost by 30% by aggregating all growth and content management actions into a single dashboard.
- Conceptualised and Launched Apric Links to help influencers create micro websites in under 5 minutes with 300+ design customisations. Scaled it from concept to 500+ users.
- Notable Apric Studios' projects: Blue Collar employment platform, an Eldercare platform, and a Healthcare platform.

ORACLE

Associate Product Consultant

SEP 2020 - Feb 2022

Consulted, developed and managed features for Oracle's Flagship Banking product to fulfil the core and digital banking needs of the leading Middle-Eastern and African Banks. Was responsible for an end-user base of 4,00,000+

- Led improvements in the financial operations of customers to reduce their end-of-day close time by 70% in 10 months.
- Delivered features 30% faster than forecast while taking care of development, performance, reliability and adoption.
- Notable Features: Account statement scheduler and alert manager, KYC Verification system, SWIFT Transaction manager, Savings and Salary manager, UX revamp for Credit Cards Management dashboard

SECFOLIO

Co-Founder, Product and Engagement Lead

Nov 2020 - Mar 2022

Created a lightweight, intuitive and highly-customisable HRMS product for Indian SMEs. Built customisations and features from discovery to implementation for one of the busiest Indian airports and largest real estate groups in India

- Secfolio users achieved better organisational visibility with org maps, 30% lower operational expense by automating approval workflows & a 25% higher employee attendance with geotagging and effort mapping
- Achieved an 85% operating margin by deploying the application on a serverless architecture which enabled high uptime and scalability with low operational costs and deep customisations.
