SKILLS

- Maven
- Git, SVN
- SQL
- Spring Data Jpa
- GCP
- Problem-Solving
- Agile
- Unix, Linux
- Jenkins
- Core Java, Spring boot.
- JUnit
- Microservices
- Hibernate
- Object Oriented

CERTIFICATIONS

- Microsoft Technology Associate for Database Administration Fundamentals.
- Java Programming for Complete Beginners.
- Internshala Certified Core Java Training.
- NPTEL Certified Introduction to Modern Application Development.

ACHIEVEMENT

HACKATHON@HEWLETT PACKARD ENTERPRISE

Got Certificate of Recognition during 3par/Primera Hackathon about the idea of "Display Data Corruption with space-filling curves".

EXPERIENCE

SAILS SOFTWARE SOLUTIONS | JAVA SOFTWARE DEVELOPER

Sep 2022 - Nov 2023 | Visakhapatnam, India

- Made and Participated in whole **spring boot** project 100% from the scratch.
- Implemented the **caching** the mechanism in API's increasing it's response performance by 30%.
- Collaborated with different teams to maintain the code feasibility and it's sustainability.
- Regularly participated in code reviews and wrote **unit test cases**, thereby decreasing the number of bugs in code by 20%.
- Followed the **Agile** Methodology and has hands on experience regarding the **Jira** Software.

HEWLETT PACKARD ENTERPRISE | SOFTWARE ENGINEER

Jul 2019 - Jul 2022 | Bangalore, India

- Developed Automation Scripts using **Java**, Python and C++.
- Based on Company requirements, Developed **REST API'S** which interacts with cloud services like **GCP** to process the data.
- Wrote the necessary the unit test cases and collaborated with QA team, there by decreasing the bugs by 20%.
- Followed **CI/CD** process to deployed the code to various env such as dev, qa, uat, prod etc.
- Always tried to participated in **code reviews** to maintain the code quality.

HEWLETT PACKARD ENTERPRISE | SOFTWARE ENGINEER INTERN

Jan 2019 - Jul 2019 | Bangalore, India

- Worked as a UI Test Automation Engineer, developing automated test cases using Selenium.

PROJECTS

PACKET TRANSACTION API

Created a REST API which helps us to store the form and user information through CRUD operation in **firestore** and through **pub/sub** store the few information in **bigquery** and used the caching mechanism to increase the performance of the API.

PDF GENERATOR API

Created REST API which help to do CRUD operation in firestore and using **external library SDK** it help us to fill the pdf with necessary information dynamically and at last merge all the pdf's.

CLOUD FUNCTIONS

Created a cloud Function in git repo which gets triggered whenever we place file in google bucket and does the CRUD operation in BigQuery.

EMPLOYEE API

Created a Simple REST API, in which we are storing the Employee information in **MYSQL Database** using **Hibernate** and we are also using **Apache Kafka** for messaging
