-

Health Care Patient Portal (Aug 2020 to June 2021)

Eminence IT Solutions (August 2021 - December 2021)

- Healthcare Patient Portal provides a platform to automate the all the healthcare activities. It provides health data exchange capabilities. Clinicians get a single, fully integrated view of patients within their own native EHR and Workflow. That gives them immediate access to actionable information for better decision-making and superior care coordination.
- Customize and personalize Salesforce.com based on requirements.
- Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects.
- Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- Customized different page layouts and assigned them for different profile users.
- Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application.
- Designed various Web Pages in Visual Force for functional needs within Salesforce.
- Worked on workflows for field updates based on time dependent workflow.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client requirements.
