A Dedicated Java Full Stack Developer with 4 years of hands-on experience, well-versed in the end-to-end development process. Expertise in creating dynamic and responsive web applications using Java technologies and Angular framework. Proficient in designing, implementing, testing, and deploying high-quality software solutions that meet both business and user needs.

PROFESSIONAL EXPERIENCE (4+ YEARS)

SOFTWARE ENGINEER, BNP Paribas India Solutions PVT. Ltd.

June 2019 - Present

Technical Skills – Angular 13 Framework, Spring Boot, MicroServices, Oracle PLSQL

Projects: eLinx and Commodity Finance

- Designed and developed a robust payment processing system for handling manually created transactions, ensuring accuracy and efficiency in financial operations.
- These applications serve as a critical infrastructure for handling a wide spectrum of transaction types, including traditional trade, cash transactions, commodities, and supply chain activities.
- Coordinated the complete lifecycle of a web application centered on transactions and customer management.
- Encompassed meticulous planning, comprehensive development, rigorous testing, seamless deployment, and consistent maintenance.
- Created web applications that are currently utilized across multiple countries for the purpose of managing bank and customer-initiated transactions.
- Migrated documents from a Content Addressable Storage (CAS) system to an Amazon S3 bucket as part of a comprehensive data management initiative.
- As part of the project development process, I utilized SonarQube to address vulnerabilities and ensure code quality.
- Configured and automated Jenkins pipelines using Groovy script for continuous Integration (CI).
- Contributed in Code review to optimize the code and documentation to maintain the best practices.
- As a senior member in the team, shared project Knowledge to new joiners.
