Experience

Senior Software Engineer | Siemens

July 2023– present

- Developed features to optimize OT devices discovery and streamline job management, significantly enhancing user interaction and productivity.
- Conducted comprehensive testing including unit tests, smoke tests, API tests, AutomaticUserAcceptance tests, and Cypress tests. Utilized Docker for streamlined deployment processes. Improved the robustness of the remote connect service, enhancing communication reliability.
- Participated in the Asset Link hackathon, focusing on integrating Modbus RS485 via DCD to detect RS485. Contributed to the development of an offline scanning tool.
- Submitted an innovative AI-based predictive maintenance solution, anticipated to increase operational efficiency by 25%.

Software Engineer | Trantor

June 2021 – July 2023

- Orchestrated backend API development and Angular frontend for a collaboration tool, integrating WebSocket technology for enhanced real-time chat capabilities.
- Development on Strand finance applications in Angular and integrated Salesforce APIs, resulting in a 40% reduction in data retrieval time and a 20% increase in data processing efficiency, enhancing overall system performance and user productivity.
- Designed and deployed the Doobert Shopify theme, increasing charity donation functionalities by 50% through integration with third-party APIs.

Software Engineer | 18 pixels

January 2020 – May 2021

- Led the development of the Khadi platform, integrating shipping, inventory, payment, and marketing services under tight deadlines, resulting in a 30% reduction in order processing time and a 25% increase in customer satisfaction through streamlined operations and enhanced service delivery.
- Pop TV admin and recharge web application, facilitating account recharges via messaging, resulting in a 30% increase in user engagement.
- Enhanced the Lahren admin panel with authentication, user management and scheduler functionalities, reducing administrative workload by 40%.

Projects

Industrial Asset Hub | Go lang, Angular

July 2023

- Developed backend services feature Remote Connection for connecting diagnose discovered devices.
- Performance test for remote connection using k6 to check service durability to handle 1000 remote connections.
- Development on multiple services including Remote agent, Device Class Driver, Wfx Gatekeeper Service, and Discovery Service in Go.
- Ensured faultless operation and scalability to meet evolving industry demands.

Collaboration Tool | Node Js, Angular

May 2022

- Created a collaborative platform tailored for students, teachers, and recruiters, integrating essential functionalities such as chat, group chat, and audio-video calls.
- WebSockets and Redis to facilitate seamless real-time communication, enhancing user engagement and interaction efficiency.
- Improved login security measures, reducing potential security risks by implementing robust authentication protocols.

E-Khadi | Laravel, MySQL

August 2020

- Led the development of Khadi India, a scalable e-commerce platform built on Laravel, facilitating multi-vendor sales.
- Managed shipping, payment, and inventory complexities, integrating coupon management and vendor panels, resulting in a 20% increase in vendor satisfaction.
- Established automated shipping services including Xpressbees, Ship Rocket, and Delhivery, reducing shipping times by 30% and optimizing logistical efficiency.

Skills

Go Lang, Javascript, Angular, Node.js, Express js, Cypress, Docker, kubernetes, Laravel, MySQL, Redis, MongoDB

Education

Indira Gandhi National Open University (Lucknow, India)

Master of Computer Application, 61%

June 2017 – June 2019

Indira Gandhi National Open University (Lucknow, India)

Bachelor of Computer Applications, 60%

June 2014 – June 2017

Bright Career Inter College (Lucknow, India)

Higher Secondary, 78%

May 2014

Achievements & Certification

- Demonstrated proficiency by solving over 300 coding problems on platforms like LeetCode and advancing to the first and second rounds of the IICC competitions.
