WORK EXPERIENCE

ZS Associates

Jan 2022 - Present

[Project Manager]

- **Business Operations (Digital Transformation)**

- Working closely as a Project Manager and SPOC with Deloitte SAP Team (Tech Consultant), ZS Global Finance Head and Vice President (Finance) to revamp the current accounting structure in the SAP ECC 6 and BW HANA System to improve the project creation process(PS). Revamped structure/process provides the ability to bill and recognize project revenue easily under various business scenarios and to develop MS Azure Data Lake to consolidate and secure finance data at single location with an objective to add multi-layer security, governance and generate supervision models.
- Implemented Lean Six Sigma methodology, Business Finance, Technical knowledge, Leadership and Project Management skills to handle these projects from start to end. Build a bridge by becoming a single point of contact between ZS finance team and Deloitte Tech team.

Responsibilities:

PS Revamp Project - Explaining the As Is accounting process of ZS → meeting internal senior stakeholders to consolidate the changes (used cases) → checking the technical feasibility of the used cases → frame business bluepring mentioning the To Be structure and project charter document → preparing POC or simulating critical solutions before design signoff → Defining and Coordinating for UT, SIT, UAT, Regression testing (on actual data), change management, impact analysis, code migration, go live, hypercare and training.

Finance Data Lake Project – Understanding AS IS process of Time and Project universe and functional understanding of BODS ETL as a discovery phase and identification of artefacts → Preparation and sign off LLD, HLD, ISB, BRD → executing user acceptance testing before respective sprint signoff → Consolidating future development used cases → Retrospective of the sprint and implementing the learning in upcoming sprint.

Larsen & Toubro Ltd.
