Education

University Institute of Engineering and Technology, Kurukshetra University August 2018 – June 2022
Bachelor of Technology in Electronics and Communication Engineering, CGPA: 7.34 Kurukshetra, Haryana

Experience

Nagarro Software Pvt Ltd.

August 2022 – Present

Associate Software Engineer

Gurgaon, Haryana

- Developed RESTful APIs using Java and Spring Boot following the MVC architecture to provide reliable and scalable data transfer between client-side and server-side applications.
- Implemented a password reset feature to send a one-time password to user's mobile phone and email address using a third-party SMS and email delivery API.
- Enhance the user experience by adding a search box, pagination, role-wise column segregation, reassign button for admin, and adding comments.
- Added functionalities to update user details (email, primary address, etc.).

Nagarro Software Pvt Ltd.

August 2022 – Nov 2022

Associate Engineer Trainee

Gurgaon, Haryana

- Worked on multiple assignments involving Product Community Website where customers can visit, register themselves, raise for review, add reviews, etc.
- Implemented REST APIs using Spring Boot with maven build and integrated MYSQL database connectivity using Hibernate to enable efficient storage and retrieval of data.
- Implemented JWT authentication to create secure login and sign-in pages protecting sensitive user information ensuring data.
- Designed and implemented various front-end components using Angular, Bootstrap and JavaScript.

The Sparks Foundation

Feb 2022 – July 2022

Software Engineer Intern

Remote

- Developed a Basic Banking System using Java Spring framework for the Backend and ReactJS for the Frontend.
- Utilized a MySQL database hosted on AWS to securely store and manage user data.
- Implemented core features, including the ability to add customers, view customer information, and facilitate money transfers between customers.
- Successfully deployed the web application on Heroku for seamless accessibility.

Projects

E-Commerce Application | *Spring Boot, MySQL, Angular*

- A company provides an E-Commerce platform to local vendors to take their business online. Local vendor can login with vendor id, choose its category of business, upload products at once, check orders based on order locations, apply discounts during festival season, view its products and check sales report.
- Providing a secure and user-friendly platform for customers to browse and purchase products or services.
- Ensuring the website is optimized for speed and performance, to provide a seamless shopping experience.

Students Record Management System | *Java, OOPs, MySQL, NoSQL(MongoDB), ReactJs*

- Implement a student record management system using object oriented paradigm in Java, which uses SQLite SQL database management system to maintain and store student data.
- Provided capabilities to create, display, modify, and delete student marks records.
- Integrated CRUD service with MySQL as well as MongoDB for NoSQL learning experience.

Blog Application | *Java, Spring Boot, Maven, Spring MVC, MySQL*

- A blog website that gives users an option to add like, comments on a blog.
- The frontend used is Spring MVC and JSP. Uses token-based authentication to send requests to the backend.
- Backend used is Spring Boot with Spring Security. The app exposes REST endpoints to communicate with the frontend.

Technical Skills

Languages: Java, C++, JavaScript, HTML5/CSS3, SQL

Relevant Coursework: Data Structures, DBMS, OOPs Concepts, Design Pattern

Developer Tools: VS Code, Eclipse, Node Js

Technologies/Frameworks: Spring Boot, Spring MVC, Hibernate, MYSQL, MongoDB, Node.js, Express.js, Git/GitHub, Angular, Jenkins
