

ZEESHAN KANUGA

Master of Engineer (2 X AWS Certified)

AWS Certified Solutions Architect (Validation Number: 2K4X8EQD5E41QKC9)

AWS Certified Cloud Practitioner (Validation Number: 3QL5XR11XF1E1JGN)

zeeshan.kanuga@gmail.com | +91 - 846 058 8848

Ankleshwar - 393001 Gujarat, India

PROFESSIONAL SUMMARY

Experienced IT Infrastructure with a demonstrated history of working in various industries. Skilled at overseeing complex company networks with a focus on efficiency and performance optimization. Detail-oriented and proactive with strong troubleshooting, training, communication, and analytical abilities.

An innovative, multi-disciplined, and solutions-oriented, possesses extensive experience with a consistent track record of designing, implementing, and integrating cost-effective, secured high-performance technical solutions.

An AWS Certified solution architect and experienced in analyzing data to identify threats, and designing automation systems using identified signatures to detect and prevent malware. Strong information-technology professional and customer-centric. Excellent communication skills with the ability to interface at all levels.

SKILLS

- **Cloud Skills:** EC2, S3, VPC, Subnets, Route-tables, Gateways, Managing Public and private IPs, ELB, RDS, EBS, Route53, Auto Scaling Groups, Cloud Trail, Cloud Watch, SNS.
- **DevOps Tools:** Jenkins, Docker, Kubernetes, Terraform, Ansible
- **Security:** IAM, KMS, Security Groups, NACLs, VPC Flow Logs
- **Networking Skills:** Network Security Architecture, Firewall Management, Log Analysis, Threat Assessment, Firewall Policy Deployment, Cyber Threat Hunting, DDoS, Performance Testing, TCP/IP, RADIUS, STP, NAT, ARP
- **Techno-Product Skills:** AWS Cloud, Fortigate Firewall, Cisco, Juniper, Ciena, Nokia
- **Operating System:** Windows, Linux, Ubuntu
- **Service Management Skills:** Incident Management, Root Cause Analysis
- **Soft Skills:** Excellent Verbal and written communication, Strong interpersonal skills and excellent presentation skills, Proactive and team player, Public Speaker

EXPERIENCE

November 2024 – Present **AWS Solution Architect | Accenture Solutions PVT LTD**

- **Cloud Infrastructure Design & Optimization:** Designed and implemented scalable, secure, and highly available cloud infrastructure on AWS, leveraging services such as VPC, EC2, S3, RDS, and Lambda. Created multi-tier architectures with public and private subnets, NAT gateways, and VPN connections to ensure secure and efficient data flow.
- **Cost Optimization & Resource Utilization:** Reduced cloud operational costs by 30% through strategic resource allocation, instance right-sizing, and the implementation of auto-scaling policies. Utilized AWS Cost Explorer and Trusted Advisor to identify underutilized resources and optimize spending without compromising performance.
- **CI/CD Pipeline Implementation:** Built and maintained robust CI/CD pipelines using Jenkins, Docker, and Kubernetes to automate application deployment and improve development efficiency. Containerized applications using Docker and orchestrated them with Kubernetes, reducing deployment times by 40%.
- **Infrastructure as Code (IaC):** Automated cloud infrastructure provisioning and management using Terraform, enabling consistent and repeatable deployments across multiple environments. Reduced manual configuration errors by 90% and improved deployment speed by 50%.
- **Disaster Recovery & High Availability:** Designed and implemented disaster recovery strategies using AWS Backup, S3 Cross-Region Replication, and RDS Multi-AZ deployments. Ensured 99.99% uptime for critical applications by leveraging Elastic Load Balancers (ELB) and Auto Scaling groups.
- **Security & Compliance:** Enhanced cloud security by implementing IAM roles, security groups, and VPC flow logs.
- **Monitoring & Performance Tuning:** Implemented CloudWatch alarms and dashboards to monitor system performance and proactively address issues. Optimized EC2 instances and RDS databases to improve application performance and reduce latency by 25%.

June 2018 – November 2024 **AWS Administrator | TATA Consultancy Services**

- Analyze issues reported by users and provide resolution within a specific time based on the priority of the ticket raised.
- Handling escalations and resolving incidents within the time given by the client, user escalating email and also raising incidents related to application.
- Day-to-day monitoring of system logs, user usage of system resources, CPU & and memory utilization
- Setup/Managing VPC, Configuring NACL, subnet, Rout-tables, Gateways as per requirement
- Working on Default VPC, Creating Custom VPC and subnets as per requirement
- Launching on-demand EC2 instances, Reserved Instances, Saving Plans, and Spot Instances to save cost based on requirements
- Extending and Encrypting EBS volumes when required.
- Scheduling Snapshot of EBS volume for Disaster Recovery
- Using the IAM service to create roles and give permission to the user
- Peering VPC across regions to establish connectivity between servers in different VPC
- Using NAT Gateway/NAT Instance to provide Internet access to Database Server without direct exposure to the internet

- Creating Custom AMI
- Configuring Elastic Load Balancers & attaching EC2 instances under it for Load Balancing of Web Servers
- Hosting static Websites on S3 also Saving Cloud Trail logs to S3
- Using Route 53 for routing traffic using different policies of routing like Latency or Weighted
- Configuring email alerts using SNS service
- Knowledge of Connecting on-premises data center to AWS Cloud via VPN or Direct Connect

October 2016 – April 2018 **System Engineer | 3i - InfoTech Limited**

- Managing system administration, networking and hardware management & maintenance in the organization
- Maintaining all domain users and computer accounts.
- Worked in user access management and remote support team.
- Deal with Network infrastructure, Maintaining Router and Switches.
- Maintain Firewall, apply all rules and policy. FortiGate 60D - FortiGate 100E
- Configure Schedule backup process and Troubleshooting.
- Monitor and test application performance for potential bottlenecks, identify possible solutions
- Performing all network planning and integration of Networks as well as system from root level.
- Experience of dealing with vendors to buy equipment for the infrastructure – analyzing and finalizing the right equipment as per the requirements.

EDUCATION

2016: **Master of Engineering** ([Communication Systems](#))

S.V.I.T. **7.66/10**

2013: **Bachelor of Engineering** ([Electronics & Telecommunication](#))

Gujarat Technological University **7.05/10**

2009: **HSC** ([Science Stream](#))

G.H.S.E.B **66.40%**

2007: **SSC**

G.S.E.B **71.23%**

PROFESSIONAL ACCOMPLISHMENTS

- **LEAN Bronze** Certified
- **Performance Improvement (PI)** Certified
- Worked as Assistant Researcher with my guide on Wireless Sensor Networks
- As a Research Student build a new topology / Network Protocol for efficient data transmission on Cluster with a mobile agent

CERTIFICATION

AWS Certified Solutions Architect (Validation Number: 2K4X8EQD5E41QKC9)

AWS Certified Cloud Practitioner (Validation Number: 3QL5XR11XF1E1JGN)

ACTIVITIES AND INTERESTS

- Reading Books
 - Playing indoor and outdoor game.
 - Photography
-
