+91-9001047499

Senior AI Engineer with over 5 years of industry experience specializing in Machine Learning, Deep Learning, NLP, RAG platforms, LLMs, Prompt Engineering and Agentic AI solutions. Proven expertise in designing and deploying AI-driven products and automation solutions across agile environments in both product and service-based industries. Skilled in end-to-end Data Science Life Cycle management, with strong proficiency in Python and a demonstrated ability to rapidly adopt emerging technologies to solve complex business challenges and deliver measurable impact.

Education

M.Tech. - Specialization in Energy Systems
Indian Institute of Technology Mandi
August 2019 - July 2021

Highlights:

- DAAD Scholar at RWTH Aachen University, Germany for thesis.
- Thesis - Sensitivity analysis of parameters in building energy simulations using Python.

B.Tech. - Mechanical Engineering
August 2012 - July 2016
Swami Keshvanand Institute of Technology, Jaipur

Skills

AI & ML: LLMs, RAG, Agentic AI, Generative AI, NLP, Deep Learning
Frameworks: LangChain, CrewAI, MLflow, scikit-learn, TensorFlow, PyTorch, XGBoost

MLOps & Deployment: Docker, Kubernetes, CI/CD (Gitlab, Jenkins, Windows Services), LLMops, REST APIs, Microservices

Databases: PostgreSQL, Redis, NoSQL (MongoDB), Vector DBs

Cloud & Automation: Azure, Power Apps, Power Automate, AI Search, API Integration

Programming: Python, SQL, FastAPI, Django, Angular, Bash, HTML, TypeScript

Others: Git, pytest, Agile/Scrum, TDD, Subversion

Achievements

Twice won **Client's First Award** (NTT Data) for timely, high-quality AI deliveries.

Selected for **Halliburton ECLIPSE Leadership Training** (APAC) for outstanding performance.

Earned Microsoft **AZ-900** and **AI-900** certifications.

Received **DAAD Scholarship** for Master's thesis in **Germany**.

Achieved multiple **Academic Excellence** Awards and Python certifications (Coursera).

Projects

AI Agents Automation Framework (CrewAI) - Built and deployed 5+ multi-agent automations integrating diverse enterprise systems to support autonomous workflows and decision-making.

POC - Email Extraction, Classification & Response Engine: Developed an Agentic AI solution to extract and analyze email and attachment data, prioritize and route messages intelligently, and generate and send AI-assisted responses with human-in-the-loop review if required.

Custom Connectors for AskGen RAG System - Designed connectors for internal data repositories and version control systems to poll updates and maintain synchronization with the vector database.

Transcript-to-SOP Pipeline - Built an LLM-based summarization tool using Open AI Whisper for speech-to-text and Microsoft Graph APIs, generating structured documents and SOPs from meeting recordings.

DecisionSpace Assisted Lithology Interpretation (ALI)

- Optimized ML microservices using Python (TDD) and deployed via Kubernetes, Docker, Gitlab CI/CD and Jenkins.
- Built ensemble and ANN models, improving accuracy by 10% and reducing training time by 50% through MLOps automation.

POC - Seismic Fault Detection

Used Machine Learning Algorithms to select optimal parameters for seismic workflows, improving result accuracy.

POC - Workflow Automation

Automated DecisionSpace processes with Datadance P7 and REST APIs, cutting manual time by ~50%.

Work Experience

Senior AI Engineer | NTT Data | April 2025 - Present

As an AI Team Leader and Individual Developer,

- Developed and deployed automations using the **AI Agents based on CrewAI** framework and **CI/CD implementation**, connecting with multiple enterprise tools.
- Contributed to an in-house **enterprise RAG-based Knowledge Management System chatbot**, enabling seamless integration with SharePoint, Azure Blob, Google Drive, ServiceNow.
- Enhanced the **Automation Engine** using **asynchronous programming** and **FastAPI** to analyze ITSM ticket data and dynamically trigger workflows based on **semantic and keyword matching**.

Technical Professional - AI | Halliburton | August 2021 - April 2025

- Enhanced ALI application using **Python, MLFlow**, improving lithology model **accuracy by ~10%**.
- Development of User Interface for ALI application using **Angular** and **TypeScript**.
- Built a **RAG chatbot** for ALI documentation to streamline user onboarding using **LLM, Hugging Face** and **StreamLit**.
- Implemented **Gitlab CI/CD pipelines** for building and deploying **Docker Images** for ALI **Microservices**.
- **Developed and Designed** an internal **Cloud Cost Estimation App** with **Power Apps** and **Power Automate**, automating sales enquiry escalation from Architecture to Cloud teams, voluntarily.
- Implemented **pytest** testing, **CI/CD pipelines**, and supported **ML model** deployment in **MLOps workflows**.

Senior BIM Engineer | Pinnacle Infotech Solutions, India | October 2016 - April 2019

- Led delivery of **3D BIM models** for FIFA World Cup 2022 Lusail Stadium, Qatar using Autodesk Revit.
- Managed design coordination and ensured compliance with international standards.
