

N Yashwanth Reddy

Hyderabad, India

+91-9959385228 Yshwnth8@gmail.com

Summary

Innovative AI/ML engineer with a strong track record in developing and deploying deep learning models and scalable AI solutions. Demonstrated expertise in designing high-performance systems, fine-tuning large language models, and integrating multi-modal AI applications, including computer vision and natural language processing. Experienced in managing cross-functional teams and engineering production-level solutions that drive operational efficiency and enhance user experience.

STRENGTHS AND EXPERTISE

- **Machine Learning & AI:** AI & Automation Strategies, Large Language Models (LLMs) & AI Research, Machine Learning & Deep Learning Architectures, Neural Networks, Reinforcement Learning & Prompt Engineering, Natural Language Processing, Transformers, LLMS, Model Evaluation & Deployment, Transfer Learning, PyTorch, TensorFlow, Scikit Learn, Keras, Hugging Face, OpenAI API, RAG
- **Programming & Development:** Python, C/C++, JavaScript, Node.js, React, Next.js, Vue.js, Software development
- **Leadership & Management:** Team Leadership, Project Management
- **Data & Technical Foundations:** Data structures, Algorithms, ML infrastructure, Optimization, Data processing, Computer Science, Accessible technologies, Speech/audio technology, SQL, MATLAB, Apache Spark, Data Science, NumPy, Pandas
- **Other Tools:** AI Coding & Development Tools, Cursor, Windsurf

PROFESSIONAL EXPERIENCE

Schneider Electric

Aug 2019 - Dec 2020

Electrical Engineer

Hyderabad, India

- Directed large-scale transmission line and relay protection projects within urban power grids, ensuring optimized energy distribution and minimal downtime.
- Coordinated project management from initial design phases through execution and completion, effectively aligning teams, resources, and timelines.
- Ensured projects were delivered promptly and with precision, achieving cost savings and enhanced system reliability.
- Identified and resolved technical challenges by applying creative solutions to improve grid performance and reduce operational downtime.

Amogen Pharma Private Limited

Jan 2021 - Dec 2021

Project Manager

Hyderabad, India

- Implemented end-to-end project management practices, overseeing project initiation, cost control, and performance monitoring.
- Maintained strategic relationships with material vendors to optimize costs and diversify capabilities.
- Initiated comprehensive project workflows at a Bio-Pharma start-up, ensuring seamless project execution.
- Analyzed issues and provided data-driven solutions to resolve challenges efficiently.
- Managed vendor relationships for R&D lab consumables, ensuring timely procurement.
- Established a world-class R&D facility from inception through procurement and installations.
- Launched two API manufacturing projects for Liraglutide and Semaglutide via recombinant DNA processes for diabetes treatment.
- Facilitated international business calls with prominent companies such as Cipla and Merck.
- Conducted weekly presentations and meetings to align staff with organizational goals.
- Achieved cost reductions by effectively managing key vendor relationships for R&D lab consumables.

Capgemini Technologies

Jan 2022 - Mar 2023

Software Developer

Hyderabad, India

- Developed and enhanced content management systems using Cognitive AI & Brain Tech Solutions, improving system efficiency and user experience
- Installed and configured Adobe AEM 6.4 version and Apache Felix console
- Developed custom components, dialogs, design dialogs, and pages, enhancing the functionality and user interface of the application
- Created client libraries for all components, facilitating easier maintenance and updates
- Built and deployed code across different environments, ensuring consistent application performance and reliability
- Implemented Component renditions using Sightly framework
- Integrated Scene7 to the website
- Designed HTML and JSP pages to align with project specifications, resulting in a more responsive and user-friendly interface

Consensys

Apr 2023 - Dec 2024

AI/ML Engineer

Dubai, UAE

- Developed state-of-the-art deep learning models for NLP, computer vision, and predictive analytics.
- Fine-tuned and deployed large language models (LLMs) using Hugging Face Transformers, BERT, and GPT architectures.
- Built AI pipelines for real-time financial forecasting, fraud detection, and risk management.
- Built a deep learning-based document AI model, reducing processing time by 40% and improving accuracy by 25%

- Engineered deep learning-based document understanding solutions, leveraging OCR, Named Entity Recognition (NER), and text summarization.
- Designed and optimized computer vision models for blockchain security and compliance automation.
- Integrated AI coding assistants like Cursors, Claude 3.7, and Windsurf to accelerate model development and debugging.
- Engineered GNNs for fraud detection, processing 100M+ transactions with 99.5% accuracy, reducing false positives by 20%
- Led cross-functional teams and managed AI projects from research to production using Agile methodologies.
- Built AI-VoiceAssist – A multimodal text & voice AI agent that automates customer support with real-time intent recognition, Text-to-SQL, and response synthesis.
- Fine-tuned multiple LLMs for code generation, financial analytics, and RAG-based document intelligence using LLaMA, Mistral, Falcon, and Phi-2.
- Built CodeFlow – A code generation & SDLC automation platform using fine-tuned LLMs optimized for cost, latency, and accuracy. Integrated PEFT, LoRA, and DeepSpeed for scalable model deployment.
- Engineered Graph Neural Networks (GNNs) for fraud detection in blockchain transactions, processing over 100M+ records with 99.5% accuracy.
- Developed AI models for predictive analytics, anomaly detection, and intelligent automation.
- Built and deployed frontend applications using React.js, Next.js, and Vue.js for AI-powered dashboards.
- Built and launched AI-powered applications, integrating GPT-based models, reinforcement learning, and multi-modal AI architectures for real-world problem-solving.
- Led AI-driven product development, designing machine learning pipelines, model evaluation metrics, and scalable AI architecture.
- Collaborated with AI research communities, contributing to open-source projects and staying ahead of advancements in AI technology.
- Conducted extensive research in cutting-edge Large Language Models (LLMs), including fine-tuning, pre-training, and custom model adaptation for industry-specific applications.
- Developed smart contracts enabling interoperability between Ethereum and other blockchain networks, which improved transaction efficiency, and collaborated with business development teams to customize smart contracts for client needs
- Integrated OpenAI's GPT models with R to create a chatbot that provides real-time business insights based on historical data. R, OpenAI API, RShiny, Plumber (for API deployment)
- Automated 80% of customer support queries, reducing response time by 60%.
- Built an R-powered financial analytics tool using machine learning models (XGBoost, LSTM) to predict stock market trends. R, quantmod, Tidyquant, Prophet, ggplot2, Shiny
Achieved 85% accuracy in forecasting stock movements, providing real-time dashboards for traders.
-

EDUCATION

Mahindra University
Bachelor of Technology, Electrical & Electronics Engineering

Aug 2015 - May 2019
Hyderabad, India
