Yatin Khullar

Magento Architect | Magento Lead | Adobe Commerce Expert

PROFESSIONAL SUMMARY

Results-driven Magento Architect & Technical Lead with 11+ years building and scaling Adobe Commerce and eCommerce platforms. Deep expertise in headless implementations, migrations (M1→M2), performance engineering, integrations, and leading distributed engineering teams for international clients. Skilled across Magento, Shopify, WordPress and modern frontend stacks.

EDUCATION

B.E. in Information Technology, University of Jammu (2009–2013)

EXPERIENCE

Net Solutions — Associate Tech Lead (14 Oct 2021 – Present)

- Architected and led Adobe Commerce (Magento 2) & headless projects (React + Next.js).
- Mentored a team of 8+, introduced code-review standards and CI/CD pipelines.
- Delivered performance tuning (30–40% speed improvements) and integrated ERPs and payment gateways.

Octopus Tech Solutions — Team Lead (01 Sep 2014 – 13 Oct 2021)

- Led Magento & PHP engineering teams; responsible for estimations, delivery, client coordination and hiring.

Virtufy — PHP Developer (04 Jan 2014 – 30 Aug 2014)

- Backend development, custom modules and Magento theme work.

ACT IT — Trainee (01 Jun 2013 – 31 Dec 2013)

- Initial experience in PHP-based web development.

SELECTED PROJECTS

- **GSF Car Parts** — Headless Magento (React + Next.js + Adobe Cloud) — <https://www.gsfcarparts.com/>

Architected headless Adobe Commerce with React/Next.js, designed GraphQL APIs, optimized caching, and led cloud deployments.

Technologies used: Headless Magento(React + Next.js + Adobe Cloud), Mysql, Redis Cache, Opensearch

- **Hancocks (B2B)** — Multi-store Adobe Commerce — <https://www.hancocks.co.uk/>

Built scalable multi-store B2B platform, integrated ERP systems, optimized pricing/ordering workflows, and improved overall performance.

Technologies used: Headless Magento(React + Next.js + Adobe Commerce), Mysql, Redis Cache, Opensearch

- **Wholesalesweets** — Multi-store Adobe Commerce —

<https://www.wholesalesweets.co.uk/>

Developed and optimized multi-store setup, enhanced search and checkout flows, and delivered performance improvements.

Technologies used: Headless Magento(React + Next.js + Adobe Commerce), Mysql, Redis Cache, Opensearch

- **CloudVapes** — Magento 1 → Magento 2 migration — <https://cloudvapes.com/>

Executed full M1→M2 migration, rebuilt custom modules, ensured SEO-safe transition, and improved site performance.

Technologies used: Magento 2, JQuery, JavaScript, AJAX, Redis Cache, Opensearch

- **Project Blitz** — Magento2 apparel store — <https://www.projectblitz.com/>

Built custom Magento modules, optimized product/catalog features, improved checkout workflows, and integrated payment/shipping systems.
