CAREER SUMMARY

Engineering Manager with expertise in scalable SaaS architecture, distributed systems, and cloud-native solutions. Proven track record of leading cross-functional teams, driving product-engineering alignment, and delivering high-impact, resilient systems. Skilled in mentoring engineers, optimizing performance, and executing strategies that improve reliability, scalability, and customer experience.

TECHNICAL PROFICIENCIES

- **Languages:** Java (advanced), Python, Go, JavaScript
- **Frameworks:** Spring Boot, Spring, Hibernate, gRPC, Kubernetes
- **Databases:** MySQL, MongoDB, DynamoDB, Redis, Elasticsearch
- **Messaging:** Kafka, RabbitMQ, ActiveMQ
- **Cloud:** AWS (S3, Lambda, Glue, Athena, Step Functions, CloudWatch)
- **DevOps:** Docker, Jenkins, Terraform, Ansible
- **Specialties:** Microservices, Distributed systems, Performance tuning

EXPERIENCE

- **Unicommerce** Gurgaon, India
Engineering Manager Jul 2025 - Present
 - Promoted to lead two cross-functional teams (10+ engineers) delivering scalable SaaS and outage-resilient systems.
 - Driving product-engineering alignment, improving SLA compliance and system reliability.
 - Mentoring senior engineers in design, distributed systems, and leadership skills.
 - Managing hiring, performance reviews, and growth planning for engineers.
- **Unicommerce** Gurgaon, India
Lead Software Engineer May 2024 - Jun 2025
 - Led OMS and Outage teams (7 engineers), ensuring timely feature delivery and system stability.
 - Architected a tenant-specific Rate Limiter, enhancing API stability and SLA compliance.
 - Migrated CPU-heavy workflows to AWS Lambda for peak scalability.
 - Automated MySQL-to-S3 archival pipelines with Glue and Athena, reducing manual ops.
 - Reduced incident resolution time by 40% via enhanced monitoring dashboards and Java 17 migration.
- **Flipkart - ClearTrip** Bangalore, India
Software Development Engineer-2 May 2023 - April 2024
 - Collaborated with meta-partners (e.g., Google) to build real-time dynamic pricing systems integrated with flight booking engines.
 - Optimized the pricing engine by implementing caching strategies, reducing response time by 40%.
 - Designed a high-availability pricing API, ensuring consistent SLA adherence even during traffic spikes.
 - Automated partner onboarding, cutting down integration time by 50%.
- **Flipkart - Fintech (FPG)** Bangalore, India
Software Development Engineer-2 July 2021 - April 2023
 - Built a multi-tenant debt recovery system, handling 8M user communications in 2 hours.
 - Integrated IVR, SMS gateways, and risk evaluation for seamless recovery workflows.
 - Created a dunning system to dynamically adjust reminders and penalties.
 - Improved risk management with real-time fraud detection algorithms.
- **Karza Technologies Pvt Ltd** Mumbai, India
Backend Developer March 2020 - July 2021
 - Built encryption wrappers to enhance data security in high-traffic systems.
 - Developed REST APIs deployed on AWS, optimizing data retrieval workflows.
- **KPIT Technologies Pvt Ltd** Pune, India
Software Engineer August 2018 - March 2020
 - Developed i-HDS Diagnostic Tool to simulate vehicle environments and retrieve diagnostic data.

EDUCATION

Army Institute of Technology, Pune
Bachelor of Engineering - Information Technology

Pune, India
July 2014 - June 2018
