

YOGESH BALASUBRAMANIAN

DevOps Engineer

Phone: +91 7200120365

Email: sbyogesh200@gmail.com

11+ years experience in DevOps, Administration and Automation Engineer possessing. In- depth experience of managing cloud-based technology & effectively handling configuration & deployment of infrastructure & services. Gained hands-on experience in implementing core DevOps concepts such as containerization, virtualization, version control, cloud computing, database management & administration, load balancing, etc. by using a wide variety of technologies while working with multiple DBMS, Operating Systems & programming languages. Drives excellence in every project to deliver outstanding results.

Technology Summary	
Software Versioning	Visual SVN, GitLab
Containerization	Docker, Kubernetes, Openshift
CI and CD Pipeline	Jenkins, Ansible
Script Language	Shell Scripting, YAML
Database	MongoDB, SQL Server
Operating System	CentOS, Ubuntu, Windows Server
Serverless	Terraform
Web Server	IIS, Apache, Node, PM2
AWS Services	EC2, EBS, RDS,S3,Elastic Beanstalk, Snapshots,
Networking	AWS VPC, Route 53,ELB,
Security	IAM, Security Group, ACL
Build Tools	Maven, NPM

Professional Experience

Anlage Infotech, Chennai (NTT DATA Services Contractor)

DevOps Engineer Senior Specialist, 12/2024 to Present

Project:

Role : Senior Devops Engineer
Duration : Dec 2024 to Present
Environment : Splunk, Github Action, EKS, Kubernetes, DX-APM, Terraform, ServiceNOW, Openshift, JFrog

Responsibilities:

- Write Jenkins Pipeline code using Groovy to integrate and automate the Build & Deployment tools for Application Deployment.
- Writing Terraform script from scratch for building Dev, Staging, Production and DR Environment.
- Deployed and managed Open Shift clusters for containerized applications, ensuring high availability and scalability.
- Developed and maintained GitHub Actions CI/CD pipelines for automated testing, build, and deployment workflows.
- Deployed and managed EKS and Kubernetes clusters for containerized applications, ensuring high availability and scalability.
- Hands on experience in AWS Cloud services like EC2, EBS, S3, VPC, IAM,ELB, Cloudwatch etc.
- Configured Application Health check Liveness Prob and Readiness Probe parameter to monitor containers health.

HCL Technologies, Chennai

Lead Consultant, 03/2023 to 10/2024

Project:

Client : NatWest, ANZ
Role : Devops Engineer
Duration : Mar 2023 to Oct 2023
Environment : Splunk, EKS, Kubernetes, DX-APM, Terraform, ServiceNOW, Openshift, JFrog

Responsibilities:

- Managed production application deployments in **EKS** Cluster.
- Deployed and managed Open Shift clusters for containerized applications, ensuring high availability and scalability.
- Write Jenkins Pipeline code using Groovy to integrate and automate the Build & Deployment tools for Application Deployment.
- Developed and maintained GitHub Actions CI/CD pipelines for automated testing, build, and deployment workflows
- Writing Terraform script from scratch for building Dev, Staging, Production and DR Environment.
- Deployed 3-Tier Architecture on AWS Cloud using Terraform - IAC
- Hands on experience in AWS Cloud services like EC2, EBS, S3, VPC, IAM,ELB, Cloudwatch etc.
- Monitoring the Application Health status and fixed the run times issues.
- Configured Application Health check Liveness Prob and Readiness Probe parameter to monitor containers health.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.

Azentio Software Private Limited, Chennai

Product Specialist, 3/2021 to 03/2023

Project:

Client : SARWA, GGI, MADA, ALSAGR, ALSAGR
Role : Devops Engineer
Duration : Mar 2021 to Mar 2023
Environment : Jenkins, JFrog, SonarQube, Ansible, EKS, Kubernetes
Shell Scripting, GitLab, EC2, ELB,EBS, IAM Policy, CentOS, Route53

Responsibilities:

- Management of Linux Servers with Multiple websites in Heterogeneous environment.
- Automating environment build and provisioning using virtualization, containerization and orchestration tools with Docker, VM Ware, AWS, Kubernetes and EKS
- Integrated Ansible Playbooks with the Terraform templates provision the Infrastructure in AWS.
- Deployed 3-Tier Architecture on AWS Cloud using Terraform - IAC
- Write Jenkins Pipeline code using Groovy to integrate and automate the Build & Deployment tools for Application Deployment.
- Point team player on Openshift for creating new Projects, Services for load balancing and adding them to routes to be accessible from outside, troubleshooting pods through ssh and logs, modificaton of Buildconfigs, templates Imagestreams etc.

- Experience in Build and Release and DevOps Engineering in Automating, Building, Deploying, and Releasing of code from one environment to other environment.
- Determine and fix environment and configuration issues. Analyze logs and communicate potential code issues to development teams.
- Automated build and deployment process using YAML and Shell Scripting.

IQVIA, Chennai

Associate Programmer, 06/2019 to 02/2021

Project:

Client : MOH, MIOT, Maayo, SVP, Sreedhareeyam, Sidilega, MGM
 Role : Devops Engineer
 Duration : June 2019 to Feb 2021sss
 Environment : Jenkins, JFrog, SonarQube, Ansible, EKS, Kubernetes, Openshift, Shell Scripting, GitLab, EC2, ELB,EBS, IAM Policy, CentOS, Route53

Responsibilities:

- Managing the Openshift cluster that includes scaling up and down the AWS App nodes.
- Experience in using JFROG Artifactory Repository Managers for Builds and storing of Docker Images.
- Experience in end-to-end building and deploying and configuring process and implementation from local environment to QC,UAT and Production.
- Automated the static code Analysis through SonarQube in Jenkins Pipeline for checkng code Quality
- Used Jenkins pipelines to drive all micro services builds out to the Docker registry using Ansible and then deployed to Kubernetes, Created Pods and managed using Kubernetes
- Experience in Build and Release and DevOps Engineering in Automating, Building, Deploying, and Releasing of code from one environment to other environment.
- Experience in managing and maintaining IAM policies for organization in AWS to define groups, create user, assign roles and define rules for role based access to AWS resources
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC.
- Experience in version control systems like Bitbucket, GIT and SVN.

AGNOSTIC SOLUTION, Chennai

Support Engineer, 02/2018 to 05/2019

Project

Client : Breeze mount, Zympay, AutoVHC, LLWR
 Duration : Feb 2018 to May 2019
 Environment : EC2, ELB, EBS, S3, Elastic Beanstalk, Snapshots, GIT, Auto scaling, CentOS, Bit Bucket, MongoDB, , Ubuntu,

Responsibilities:

- Worked in Container based technologies like Docker, Kubernetes and Openshift.
- Worked on CI/CD tool Jenkins to automate the build process from version control tool into testing and production environment.

- Automated complete Continuous Delivery pipeline, using Configuration management tool.
- Automated build and deployment process using Python and Shell Scripting.
- Used Jenkins pipelines to drive all micro services builds out to the Docker registry using Ansible and then deployed to Kubernetes, Created Pods and managed using Kubernetes
- Worked on CI/CD tool Code Star and Jenkins to automate the build process from version control tool into testing and production environment.
- Creating Amazon EC2 instances using command line calls and troubleshoot the most common problems with instances and monitor the health of Amazon EC2 instances and other AWS services.
- Setup/Managing Linux Servers on Amazon (EC2, EBS, ELB, SSL, Security Groups, RDS and IAM).
- Experience in version control systems, including AWS Code Commit, GitHub, Tortoise SVN.
- Setup/Managing VPC, Subnets; make connection between different zones; Blocking suspicious ip/subnet via ACL.
- Creating/Managing DNS records on Amazon Route 53, Linode and go-daddy panel.

SYSMANTECH, Chennai

Client Support Engineer, 11/2016 to 01/2018

Project:

Client : Shopping Zones, Promedia, MMA

Duration : Nov 2016 to Jan 2018

Environment : EC2, ELB, EBS, CentOS, Ubuntu, Route53, Godaddy, CPanel

Responsibilities:

- Responsible for architecting, designing, implementing and supporting of cloud based infrastructure and solutions
- Hands on experience in AWS Cloud services like EC2, EBS, S3, VPC, IAM, ELB, Cloudwatch etc.
- Provide Application level support for Windows Server 2008 & 2012, Windows 7 and Office 365.
- Creating/Managing AMI/Snapshots/Volumes, Upgrade/downgrade AWS resources
- Create S3 Buckets and also managing policies for S3 Buckets.
- Creating Amazon EC2 instances using command line calls and troubleshoot the most common problems with instances and monitor the health of Amazon EC2 instances and other AWS services.
- Provide support of Office 365 and Teams SharePoint
- Deploying applications in respective environments using Elastic Beanstalk
- Manage systems routine backup, scheduling jobs and enabling Cron jobs.
- Giving support to remote client using LogMeIn based on all software installation and troubleshooting.
- Resolve issues related to Windows, network connectivity, as well as problems associated with software and hardware errors.
- Research client's issues in a timely manner and follow up with the customer with recommendations and action plans.

CARE IT SOLUTION, Chennai

System Administrator, 12/2014 to 06/2016

Project:

Company : Care IT Solution
Duration : Dec 2014 to Jun 2016
Environment : EC2, ELB, EBS, CentOS, Ubuntu, Route53, Godaddy, CPanel

Responsibilities:

- Management of Linux Servers with Multiple websites in Heterogeneous environment.
- For new services, setting up AWS region from scratch till production release using, EC2, RDS, Route53, VPC,
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC
- Supported AWS Cloud environment with 120+ AWS instances and configured Elastic IP & Elastic Storage and also experience working on implemented security groups
- Installing and configuring computer hardware operating systems and application.
- Responsible for maintain the network up and troubleshooting the network related issues.
- Responsible for day to day operations and administration of the IT infrastructure.
- Monitoring network maintenance activities and ensuring prompt troubleshooting of network problems, to achieve maximum network uptime.

VISHNU PHARMACEUTICALS, CHENNAI

System Administrator, 10/2012 to 11/2014

Company : VISHNU PHARMACEUTICALS
Duration : Oct 2012 to Nov 2014
Environment : EC2, ELB, EBS, CentOS, Ubuntu, Route53, Godaddy, CPanel

Responsibilities:

- Management of Linux Servers with Multiple websites in Heterogeneous environment.
- Experience with systems installation, configuration and administration UNIX / Linux and Windows based systems.
- Hosting a website in windows and Linux server using Route53 and GoDaddy control panel.
- Implement the build automation process for all the assigned projects in vertical apps domain monitors the UAT/production environments for any downtime issues by performing regular CRON job updates in servers. Creating/Managing DNS records on Linode and go-daddy panel.
- Used Logical Volume Manager for the management of Volumes including creation of physical and logical volumes on Linux
- Analyzing and solving day-to-day Production issues with client facing skills.
- Installed software, patching, upgrading and maintenance of operating system via networks
- Involved in troubleshooting departmental network like improper IP addressing, gateway problems, switch failures etc.

Education

- Bachelors in Computer Science and Engineering (BE) from **Anna University**.

- 12th in Town Higher Secondary School, Kumbakonam.
 - 10th in Vallar Higher Secondary School, Kumbakonam.
