PROFESSIONAL OVERVIEW

Results-oriented and innovative Software Engineer with over 6 years of industrial backend experience in developing scalable applications. Proven expertise in designing, developing, maintaining, and implementing diverse projects, leveraging a strong technical skill set to drive efficiency and enhance performance.

WORK EXPERIENCE

Software Engineer 2

Microsoft IDC - Noida, India | 2023 - Present

- Upgraded vulnerable packages, VM scale sets, migrated classic release pipelines to 1ES PT and upgraded Service Fabric clusters to enable use of Managed Identity for secure Azure Storage access.
- Built features and fixed bugs in TMS, CIT, and Create services. Ensured reliability of TMS serving ~400M daily requests in Office apps.
- Improved mobile UX, localization, accessibility for designer.microsoft.com. Boosted mobile usage from 9% to 23% (Jan-Apr '24).

Senior Software Engineer

Paytm - Noida, India | 2023 - 2023

- Developed a configurable grid system to automate loan foreclosure logic and charges based on lender and product type (PL, MCA) in the Lending team.
- Reduced Late Payment Fee (LPF) processing time for Postpaid product from 4 hours to 2 hours by generating invoice numbers during invoice creation.

Software Engineer

Turvo - Hyderabad, India | 2021 - 2023

- Upgraded Mongo/Spring/Hibernate across Turvo's platform, enabling live sharding and scaling to handle 6M API requests/min.

Software Engineer 2

Synopsys - Bengaluru, India | 2019 - 2021

- Developed and maintained backend features for VC Formal apps (FCA & AEP), supporting enterprise clients like Intel, Qualcomm, Nokia, Nvidia, and more.
- Redesigned FCA and AEP architecture to align with the updated VC Simulation flow, enabling correct support for Verilog designs via the new Adjust Pass feature.
- Implemented auto-waiving of coverage properties in the Coverage Sign-Off flow, deployed successfully at Samsung.
- Built support for Arithmetic Overflow and Simultaneous Set/Reset checks for VHDL designs from scratch. Deployed at Nokia, leading to the replacement of OneSpin with VC Formal.

EDUCATION

Bachelor of Engineering

Thapar Institute of Engineering and Technology, Patiala

2015 - 2019

GPA : 9.14/10

SKILLS

- C, C++, Java, Golang, React, Typescript
- Data Structures and Algorithms, Distributed Systems, High level Design, Low Level Design
- Spring, Springboot, Hibernate, Maven, Tomcat, MySQL, MongoDB, Redis, Kafka, AWS, Azure, Jenkins, Elasticsearch, CI/CD, Graphana

RECOGNITION

- Recognized as Best R&D Engineer across the global VC Formal team for impactful contributions.

INTERNSHIP

Samsung R & D - Bengaluru | 2019

- Worked on the development of PMD module which is used for faster and efficient memory allocation in mobile devices.
