WORK EXPERIENCE

SDE-3
CARS24

Dec 2023 – Present
Gurgaon, India

Inspection App

- Revamping the **Inspection App** (Internal app) with implementing new architecture and tools
- Implementing dependency injection using Hilt in the app to make the app more testable and scalable.
- Working on the automation testing of the app using Appium to make deployment more easy and reduce the work of QA.
- Reduced app size by 40% (from 100 MB to 60MB) by refactoring of the code.

INSPECTAI

- Developed the **INSPECTAI** (Internal app) from scratch with implementing MVI architecture.
- Implementing dependency injection using Hilt in the app to make the app more testable and scalable.
- Created multi modules like Camera, LocationTracker, Logging, Network, LoginManager, DS etc from scratch.
- Adopted feature based clean architecture throughout the app.
- Backend Driven UI with the DLS (Design Library System) implementation to make UI consistent and flexible.
- Implemented the OBD(On-Board Diagnostics) to communicate with the Car Engine and get all the necessary malfunctioning, DTC of the Engine.
- Worked on the Infotainment Automotive App of the CARS24.
- Created pipeline on the bitrise to create APK/AAB file for the different flavours.

Skills Used:- Coroutines, LiveData, Clean Architecture, MVVM Architecture, RealmDB, Room DB, WorkManager, CameraX Api, Kotlin, Firebase, Locus SDK, Embrace, Appium, Bitrise, CI/CD.

Senior Android Developer
Fashinza

Oct 2022 – Dec 2023
Gurugram, India

- Created and developed a B2B app for suppliers named **“TrakTez”** from scratch using MVVM and clean architecture. Used coroutines for the multi-threading and have used room databases for the offline support even when network is not available.For the better user experience, I have developed a custom camera and image editing library so that users can edit images like WhatsApp and can maintain the resolution of images.Used dependency injection in the application to make application more testable and to make code more reusable.
- Developed **“TrakTez Checker”** app to make working of finishing and stitching lines smooth with offline support and used workmanager for background working.
- Developed **“TrakTez Dashboard”** a TV app to view all the statistics over a screen

Skills Used:- Coroutines, LiveData, Clean Architecture, MVVM Architecture, Dependency Injection, Hilt, Room DB, WorkManager, Navigation Compose, CameraX Api, Kotlin, Firebase.

Software Engineer - Android
LBB | Nykaa

Oct 2021 – Oct 2022
New Delhi, India

- **LBB** is an e-commerce and content based platform with more than 1M+ daily users.
- Used MVVM architecture and coroutines to make the app more testable.
- Developed in-app review feature which increases app reviews by 42% in a month.
- Implemented UPI payment method using RazorPay SDK.
- Implemented Facebook login in the app.
- Designed and developed the landing pages of the app i.e. Locality, tag pages etc which increase the user engagement by 27% daily.

Skills Used:- Kotlin, Coroutines, LiveData, Clean Architecture, MVVM Architecture, Room DB, WorkManager, Navigation Compose, XML, Firebase, Realm DB, RxJava, Facebook SDK, RazorPay SDK.

Android Developer Intern
CreateBytes

May 2021 – Oct 2021
Gurugram, India

- Designed and developed the report page of the **KhataBook App**. Used navigation compose all over the app. Also designed and developed the profile page of KhataBook app.
- Improved the logic and api call architecture in the KhataBook app which decreased the UI Rendering time by approx 60%.
- Created another project i.e. LCMS from scratch. Designed the app using MVVM pattern and navigation compose.

Skills Used:- Kotlin, Coroutines, LiveData, Clean Architecture, MVVM Architecture, Room DB, Navigation Compose, XML, Firebase, Realm DB, Paging Library.

SKILLS

Languages: Java, Kotlin, Python, C++, HTML5, XML

Frameworks and Libraries: Maven, Gradle, Spring Boot, Jetpack Compose, Paging, Coroutines, Git.

Databases: SQLite, Room Database, Firestore Database, RealTime Database, Realm, MongoDB.

Tools: Android Studio, Firebase, Third Party APIs(Google MapsAPI, PlacesAPI, FacebookAPI, PaymentGatewayApi ,etc), Authentication,Rest API, Android Debugging Tools, AVD Manager, Architectural Pattern, RxJava, Retrofit, CameraX, Android Studio.

Version Control: GitLab, GitHub

Project Management: JIRA, Linear, Trello.

Managerial Skills: Interviewed and hired interns for the android team.

Currently Learning: Jetpack Compose and Kotlin MultiPlatform (KMP)

PROJECTS

• **GHAT** – The solution was proposed against the problem statement pg 179 by the Ministry of Jal Shakti in Smart India Hackathon 2020. It gives solutions regarding development and tracking of riverfronts, ghats and crematory etc. Related Links – [GitHub](#), [Video description](#). Led my team till the Grand Finale of the SIH 2020.

EDUCATION

Bundelkhand Institute of Engineering and Technology
Bachelor of Technology in Computer Science and Engineering
8.2 CGPA

July 2018 - May 2022
Jhansi, Uttar Pradesh
