Location Pune, India

SUMMARY

Data engineer with 5 years of experience across telecommunication, finance and banking domain. Strong analytical and problem solving skills with ability to work collaboratively in team environment ensuring the quality and consistency of data, as well as adherence to data governance policies and regulations.

- Gathered and analyzed requirements for the enterprise-wide Data Warehouse, driving as per industry regulations.
- Created data pipelines to ingest data from various sources into databases.
- Good knowledge in optimizing spark data pipelines to decrease time required for data ingestion jobs.
- Experience in handling various source data formats such as CSV, TXT, XML, Excel, JSON and Parquet.

SKILLS

Python	Unix Shell Scripting	Pyspark	
MySQL	Oracle	Vertica	MongoDB
Azure Data Factory	Azure Databricks	Azure Storage	Azure Cosmos DB
Azure Functions	Azure Logic Apps		

EXPERIENCE

Senior Data Engineer at LTIMindtree Ltd. (Formerly Larsen & Toubro Infotech Ltd.)

03/2022 - Present | Pune

- Spearheaded the design phase of development by providing insights on architecture and ETL strategy for data loading from on-premise setup to cloud; implemented a data segmentation strategy that reduced data processing time.
- Gathered and defined customer requirements by analyzing existing on-premise orchestration tools like Informatica and Talend and data loading scripts.
- Developed and managed Azure Data Factory pipelines that extracted data from various data sources, transformed it according to business rules, using databricks notebooks that utilized Pyspark and consumed APIs to move data to Azure Cosmos DB.
- Migrated on-prem 4 TB MongoDB data to Azure Cosmos DB as part of one time migration.
- Developed ADF pipelines with encryption and decryption logic of PII data in Databricks using Pyspark UDF for incremental data loading from Vertica DB to Azure Cosmos DB.
- Researched and developed different data loading approaches to optimize end to end process and saved costing for customer in cloud.

System Engineer at Tata Consultancy Services Ltd.

10/2018 - 03/2022 | Chennai

- Created data extraction, cleansing and load programs to ingest data from over 1000 networking devices to Oracle DB ensuring high data availability and low latency.
- Migrated and upgraded all existing setup from Solaris to CentOS & RHEL OS with zero functionality change.
- Gathered requirement from client and worked on it single handed from offshore.
- Parsed data packets received from external resources and loaded them in data lake for future reference using Python and Unix Shell Scripting.
- Integrated and configured new network devices for data polling and ensured proper data ingestion with availability in database and front end applications.
- Using agile approach, participated in scrum meetings, developing user stories including acceptance criteria.

EDUCATION

Bachelor of Technology

Bharati Vidyapeeth College of Engineering, Pune

CGPA

9.5

CERTIFICATIONS

- ✦ Microsoft Certified: Azure Fundamentals (AZ-900)
- ✦ Microsoft Certified: Azure Data Fundamentals (DP-900)
- ✦ Microsoft Certified: Azure Data Engineer Associate (DP-203)
- ✦ Databricks Certified Data Engineer Associate
