

Yash Deep Goenka

Results-driven professional with 13+ years of experience in software engineering, specializing in leading multi-disciplined teams with diverse technical backgrounds. Proven track record of cross-functional collaboration to innovate and solve business challenges. Adept in crafting highly scalable and state-of-the-art software systems and optimizing engineering processes. Experienced product growth from 0-1 and 1-100.

PROFESSIONAL EXPERIENCE

Software Engineering Manager - Betterplace, Bangalore

Dec 2021 - Present

- Orchestrated the revamp of the company's flagship product to a hybrid cloud microservices based architecture, with a daily active user base of over 100k, leading to reduction in technical debt by 60% and a scale of 2M+ daily API calls
- Directed the optimisation of the cloud architecture, leading to a reduction in infra cost by 30% on MoM basis
- Led the initiative for the transformation of the product's UX spanning across web, android and IOS apps, leading to an increase in user engagement by 25%
- Collaborating with product and program teams to strategize product roadmap on annual and quarterly basis
- Leading 25 engineers across 2 teams consisting of BE, FE and mobile developers, with experience spanning from 0-10 years.
- Responsible for performance evaluation of direct reportees by defining, measuring and monitoring OKRs and KRAs on a quarterly basis.
- Spearheaded the integration of deep learning CV models into the mobile app, which drives visual attendance marking of 10k+ users on a daily basis
- Partnered with support and CST teams to implement 24/7 on-call process

Engineering Manager - Everwell Health Solutions, Bangalore

Nov 2020 - Dec 2021

- Collaborated with officials from the Ministry of Health (India) to successfully deliver the diagnostics module for the MoH's Ni-kshay platform, to empower test lifecycle and drug regimen management for over 12 million TB patients in India.
- Led a restructuring initiative, transitioning 3 engineering teams from a strict track-based (waterfall) approach to an agile-based structure, resulting in a 40% increase in development velocity over a span of two quarters.
- Planned and executed the transformation of a large monolithic application into a microservices-based architecture.
- Introduced Infrastructure as code (Terraform) and executed the migrations of services to Kubernetes to empower a cloud-agnostic deployment platform.

Engineering Manager - Instamojo Technologies, Bangalore

Jan 2020 - Oct 2020

- Directed over 25+ engineers across three product development teams, ensuring successful transition to remote work at the onset of covid while ensuring 100% roadmap delivery.
- Planned and executed the technical integration of getmeashop.com (A B2B SaaS e-commerce store) into the Instamojo ecosystem
- As an individual contributor, converted the organization's entire AWS based cloud infrastructure to code (IAC) using terraform and the hashicorp stack.

SKILLS

Programing Languages

Python, Java, Javascript

Frameworks/Libraries

Django, Spring Boot, Express.js, Flask, FastAPI, gRPC, AngularJS, React

Databases

MySQL, PostgreSQL, MongoDB, Elasticsearch, Redis

Message Queues/Streaming

RabbitMQ, AMQ, Kafka, Celery

Cloud/Devops

AWS,GCP, Docker, Kubernetes, Terraform, Jenkins, Shell/bash Scripting

AI/Machine Learning

ML, Deep learning (CNN, LSTM, Transformers), NLP, Pandas, Numpy, Keras, SKLearn, Tensorflow, Pytorch, Jupyterlab

EDUCATION

Master Of Science (OMSCS)

Georgia Institute of Technology (Georgia Tech)

2023-2025

Computing Systems and Machine Learning

Master Of Science

Liverpool John Moores University

Machine Learning and Artificial Intelligence

Bachelor in Computer

Applications

Sikkim Manipal University

Tech Lead/Engineering Manager - Success4 Inc (DecisionMinds India Ltd), Bangalore

Sept 2017 - Jan 2020

- Drove end-to-end architecture and development of the company's flagship enterprise product, based on a microservices based multi-tenant architecture.
- Led a team to design and implement the global CI/CD cloud orchestration pipeline for a Fortune 100 client using Infrastructure as Code.
- Oversaw the growth of the product engineering team, expanding it from a core team of 5, to 2 teams of 17 product engineers

Senior Software Engineer - Walkover Web Solutions, Indore (India)

Nov 2015 - July 2017

- Spearheaded the development of a B2B SaaS accounting product from scratch. Oversaw the MVP launch and scale from 0 to 1.
- Architected the backend services for transactions and ledger management based on spring boot and postgres
- Implemented the product's frontend SPA based on AngularJS

Senior Software engineer - Viscus Infotech, Indore (India)

Feb 2015 - Oct 2015

- Contributed to the design and development of a financial web application as a full stack developer. Utilized a technology stack encompassing Node.js, AngularJS, and PostgreSQL and various AWS services

Software Engineer II - FCS Software Solutions, Noida (Delhi, NCR)

Feb 2012 - Feb 2015

- Leveraged a comprehensive technology stack including Python/Django, Node.js, AngularJS, and MySQL to drive development of web applications across multiple projects.

Software Engineer - IYogi Technical Services, Gurgaon, (Delhi, NCR)

Dec 2010 - Feb 2012

- Contributed to various software development projects, utilizing a stack consisting of Java, Php and MySQL.
