PROFILE

Versatile Software Engineer and Tech Entrepreneur with around 3 years of experience, adept in C++ and JavaScript frameworks like Node and React. Known for crafting and steering scalable software architectures and distributed systems. At VitalX, as Founder & CEO, I've built a healthtech platform from the ground up, demonstrating a robust blend of deep technical expertise and strategic leadership.

EMPLOYMENT HISTORY

Jul 2023 — Present	Co-Founder, VitalX	Bengaluru
Drove tech from 0 to 1 at a healthtech startup, VitalX, after a successful tenure at Amazon. Responsibilities and achievements include:		
- Recruited and led a dynamic team of developers to build the innovative VitalX platform. - Architecturally designed the platform using the PERN stack (PostgreSQL, Express.js, React, Node.js) to ensure a robust, scalable solution. - Managed AWS deployments, configuring cloud services to enhance platform reliability and performance. - Optimized system architecture by implementing Object-Relational Mappings (ORMs), Docker for containerization, and Redis for caching, resulting in significant performance enhancements.		
May 2022 — Jun 2023	SDE (PA), Amazon	Bengaluru
Working with Transportation financial services		
- Developed and scaled 'Jury,' a service designed to identify and manage invoice discrepancies, improving overall efficiency. - Implemented Infrastructure as Code (IaC) for a highly coupled service, significantly reducing AWS resource maintenance costs. - Streamlined dependency management for various financial processes through effective automation.		
Jun 2021 — May 2022	SDE, UpGrad	Bengaluru
- Spearheaded the design of UpGrad's new Home Page, creating multiple components for Homepage using reactive components and implementing a mobile-first approach. - Collaborated on the migration of the website from Nuxt.js to Next.js framework, enhancing performance and maintainability. - Optimized website architecture for SEO, resulting in improved search engine visibility and user engagement.		
Jan 2021 — Jun 2021	SDE Intern, National Instruments	Bengaluru
- Serving as a developer on the RFmx LabView API and Framework team, focused on optimizing internal tools utilized by NI developers worldwide. - Contributing to LabView enhancements using C# .NET by applying graph-based algorithms to improve simulation times for circuit-based VIs.		

EDUCATION

Jun 2017 — Jun 2021	Computer Science(B.Tech), IIIT Pune	Pune
Apr 2015 — Apr 2016	12th CBSE, SKPS	Indore

SKILLS

Node.js	Experienced	Javascript	Experienced
C++	Expert	PostgreSQL	Experienced
Typescript	Experienced	AWS	Expert

ACHIEVEMENTS

- Delivered engaging workshops on Web Development at the Google Developer's Fest in Pune (2019), sharing industry insights and best practices.
- Served as Head of the Coding Club - Cypher at IIIT Pune, mentoring and preparing members for competitive coding events.
- Secured the Runner-up position in a Hackathon hosted at IIIT Gwalior (2018), showcasing innovation and technical prowess.
