TECHNICAL SKILLS

Languages: Golang, Python, Java

Backend Technologies: Gin, FastAPI, AWS (EC2, ECS, SQS, CloudWatch)

Frontend Technologies: React.js, Redux, Next.js

Tools: Git, GitHub, Postman, Kubernetes, Docker, JIRA, Frida

Databases: MongoDB, PostgreSQL, BigQuery, Redis

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Functional Programming, Clean Code, MVC Architecture, RESTful APIs

EXPERIENCE

Software Developer Engineer

Jun 2022 – Present

Anakin (YC S21)

Bangalore, India

- Developed **microservices** to handle **long-running tasks** independently, effectively reducing backend wait times and improving overall system efficiency, ensuring seamless request handling.
- Designed and implemented a highly scalable and robust CI/CD pipeline using **AWS (EC2, ECS, SQS, ECR, CloudWatch)** and **Docker**, enabling dynamic scaling and efficient management of multiple microservices. This significantly reduced deployment overhead and improved system resilience.
- Developed and maintained a high-performance web data-analysis system, replicating **Looker Studio** to meet specific client requirements that were unmet by the original platform
 - * Built a robust API layer for seamless, **low-latency data retrieval** and manipulation from BigQuery, handling up to **10,000 requests per minute**
 - * Designed and executed a high-availability system capable of handling peak loads of **5,000 concurrent users**; integrated **load balancers** and **Docker** environments, ensuring reduced **downtime to less than 1% per month**.
- Engineered a web matching application to automate cross-website product matching, processing over **30,000 products** entries daily and providing **accurate data to clients**.
 - * Automated the matching of products across various platforms, significantly **reducing manual effort and processing time by 40%**.
 - * Enhanced system speed and accuracy, **minimizing errors** and achieving a **25% cost reduction**.
 - * Implemented user and admin dashboards for **efficient workflow management** and **real-time task tracking**, handling up to **500 concurrent tasks**
- Designed **Brand EcoSystem** to enabling real-time inventory monitoring and management. Currently utilized by **over 10+ brands**, **boosting revenue by 12.4%**.
 - * Enabled brands to log in and **view prices and stock availability of their products** across **10+ e-commerce** and **grocery** platforms.
 - * Allowed brands to select products and subscribe to 3+ platforms, with **automated alerts** for low stock levels in **50+ different regions** on subscribed platforms.

EDUCATION

Masai School

Full Stack Developer

Bangalore, India

Sept 2021 – Jun 2022

Delhi University

Bachelor's Degree

New Delhi, India

Jul 2019 – Jun 2022
