SUMMARY

I am a software developer with **3+ years** of experience in **Java Backend Development**, committed to continuous learning and skill enhancement. Seeking challenging opportunities to leverage my expertise in building robust, scalable backend solutions.

SKILLS

Languages: Java, Python, SQL, HTML, CSS

Technologies/Databases: Data Structures & Algorithms, Spring Boot, Spring MVC, REST APIs, Microservices, PostgreSQL, JPA, Hibernate, MongoDB, OOPS, Kafka, Redis.

Tools: Maven/Gradle, Postman, IntelliJ, Git, JIRA.

PROFESSIONAL EXPERIENCE

Ajio, Jio Platform Limited

Software Development Engineer I

Bangalore, Karnataka, India

Jan 2023 – present

Promotion Engine:

- Devised and elevated the Promo Management Service for Ajio B2B (**e-commerce** app), optimizing the application of promotions and vouchers to deliver discounts efficiently and enhance customer satisfaction.
- Developed and optimized **15+ RESTful APIs** and services using **Spring Boot** to handle various promotional strategies, ensuring a reliable platform that processes tons of discount redemptions monthly.
- Implemented key promotional strategies, including the "Buy X, Get Y OFF/FREE" feature, contributing to a **15%** increase in customer engagement and driving **10%** revenue growth.

Reliance Jewels:

- Developed Gold Saving Scheme service for R-Jewels, a jewelry **e-commerce** platform, streamlining scheme operations contributing to a **20%** growth in scheme participation.
- Built **REST APIs** with **Spring Boot** to facilitate user creation, account verification, and address management, while integrating e-KYC via **Jio-Digilocker**, which reduced onboarding time by **30%**.
- Implemented service for E-Sign document & Invoice pdf generation reducing manual document creation efforts by 40% using **apache-pdfbox** library.

Tata Consultancy Services

Systems Engineer

Pune, Maharashtra, India

Jun 2021 – Dec 2022

- Contributed to **Ignio, Digitate's** (TCS startup) flagship product, as a **Java** Spring Boot Backend Developer.
- Engineered and enhanced Collaboration room module for enterprise to resolve or triage incidents which reduces MTTR by **70%** and boosted operational efficiency by **25%**.
- Created REST APIs and services in Spring Boot, utilizing PostgreSQL databases and refactored Java code to improve modularity and fixed bugs, decreasing bug occurrences by 20%.

A2Infotech

SDE Intern

Bhopal, Madhya Pradesh, India

Aug 2018 - Jan 2019

- Gained expertise in Java **collections**, **JDBC** and data storage layers reducing query processing time by **25%**
- Enforced all these concepts in an Examination Portal App project which was part of the training.

PROJECTS & OUTSIDE EXPERIENCE

QEats

Mar 2023 – May 2023

- QEats is a food ordering app that allows users to browse and order their favorite dishes from listed restaurants.
- Built different parts of the QEats backend which is a Spring Boot application.
- Skills: Java, **Interfaces**, HTTP, Spring Boot, Spring Data, REST APIs, **MVCs**

Notepad with speech recognition

Nov 2020- Feb 2021

- Python project builds with Model-View-Controller (MVC) design pattern, integrating libraries such as SpeechRecognition and PyAudio packages.
- Applied robust encryption and decryption functionalities for text, showcasing adept skills in secure data handling

EDUCATION

University Institute of Technology, RGPV, Bhopal

Bachelor's, Information Technology

Aug 2017 - Jun 2021

GPA: **8.1**
