Experienced backend developer with over 4+ years of experience, skilled in working with both relational databases (MySQL, PostgreSQL) and non-relational databases (Elasticsearch, Solr). I have hands-on experience with GCP, Kafka, Kubernetes, Docker, and monitoring tools such as Prometheus and Grafana.

SKILLS

Golang	Solr	Java	.NET Framework	GCP
MySQL	PostgreSQL	C++	Docker	Machine Learning
Python	Data Structures	Redis	Kubernetes	REST API

PROFESSIONAL EXPERIENCE

Filo Edtech • Gurugram

Software Developer

Jan 2022 - Nov 2023

- Developed a search system for K-12 students, enabling them to find accurate video and text-based solutions for academic questions. The search results are highly accurate, exceeding a 90% accuracy rate. Implemented using Elasticsearch, Kafka, MySQL and Golang.
- Developed a machine learning-based profanity detector model, resulting in a significant cost reduction of \$1,500 per month. Implemented the model to automatically filter and flag inappropriate content, enhancing content moderation efficiency and reducing manual review overhead.
- Proficient in designing, implementing, and optimizing Kafka consumers to efficiently process and consume data streams. Collaborated with cross-functional teams (Analytics) to define data ingestion requirements and implemented real-time data pipelines using Kafka.
- Engineered scalable FCM and WhatsApp notification system, ensuring efficient cross-platform messaging. Implemented queuing and load balancing for high availability

Freelancer (Copains Technologies) • Remote

Software Developer

Dec 2020 - Dec 2021

Contracted to work with various clients in a backend development role. Focused on projects involving Java, Python, Golang, MySQL

Indus Valley Partners • Noida

Associate Software Engineer

Jun 2019 - Nov 2020

- Design and development of complex and high performing solutions along with major dashboards, configuration screens using various Web technologies like ASP.NET using C# as the code-behind language in n-tier architecture, SQL, React.js, JavaScript, JQuery, HTML, CSS, and Ajax.
- Worked on Performance Patch: improving events handling, database procedures. Database interactions and scripts for saving, updating and retrieving the Recon configurations and Reconciliation input/output data

Nvidia • Pune

Internship - System Software Engineer

Jul 2018 - Dec 2018

- Worked with the Display Driver Team to Administer the Development of a New test framework for automated and manual testing of Display driver features.
 - Contributed in the Development of iOS Application for Mosaic Display using swift language.
-

EDUCATION

Bachelor of Engineering

Majors: Electrical and Electronics

CGPA: **7.5**

Birla Institute of Technology and Science (BITS), Pilani

2014 - 19
