WORK EXPERIENCE

Software Developer 2 Microsoft R&D Pvt. Ltd

July 2019 - Present
Bengaluru, India

Part of Viva Insights team that develops features to improve productivity and well-being with data-driven, privacy-protected insights and recommendations for customers.

- Worked on **Outlook Insights Add-in**:
 - Lead the feature development for Read stats from scratch to show Read percent to users for email having recipients more than 4.
 - This API gets around 400M/Day and is one of the premium features of Outlook insights product.
 - Worked on gathering requirements, finalizing design, and building the service that powers this nudge.
 - Used event based design architecture to make system loosely coupled with partner services.
 - Developed testing suite for the same to catch any issues across the rings
 - Responsibilities includes owning feature end to end and guiding 3 SDEs on the product.
- Worked on **Admin platform**:
 - Worked on the development of Copilot dashboard access management setting. Feature focused around detection and assignment of access for Copilot dashboard.
- Worked on **Email Platform**:
 - Email Templating library: Created different reusable Html/AdaptiveJson components which decreases email card development time.
 - Configuration Driven Development: Implemented configuration driven email card development which helps in decreasing card development time of partner team by removing need of writing 4-5 extra classes.

Intern Siemens EDA (formerly Mentor Graphics)

Jan 2019 - Jun 2019
Hyderabad, India
