EXPERIENCE

Citrix

📅 Aug 2022 – Sept2023

- Implemented Components for the Workspace App using React and Redux toolkit for state management.
- Optimised the App using memoisation, debouncing and code splitting,enhancing the performance by 30%.
- Implemented unit test cases,ensuring the reliablity and stability of Workspace app.
- Resolved issues related to Daas (Desktop as a Service) and VDA (a component in DaaS that is responsible for providing remote Desktops and Apps).

Joveo

📅 April 2021 – July 2022

- Developed the NRTS (Near Real Time Schedulers) making the Schedulers to Deliver the Job Outbound Feed On Publisher demands.
- Leveraged React to architect the UI for the SDK.
- Developed components for MOJO (Machine optimised Jobs) product.
- Implemented data handling techniques like pagination , sorting and searching filters improving data presentation and user experience.
- Employed optimisation techniques such as Cancel Token for axios calls, debouncing and throttling and code splitting to improve the performance by 40%.

Kritikal Solutions

📅 Aug 2020- March 2021

- Created dynamic and responsive Web Pages using HTML and CSS and Javascript.
- Developed components for a for a prominent car selling company using react.
- Implemented a Multi Lingual feature,enabling presentation of content in diverse foreign languages.
- Engineered user-friendly shopping cart functionality utilizing the Context API and the useReducer hook.

SKILLS

- Javascript,React,HTML, CSS,Redux Toolkit,Bootstrap, Material UI
- Performance optimisations in React
- Building responsive layouts
- React hooks: `useReducer`, `useState`, `useEffect`,`useMemo` and `useCallback`. and context Api

ACHIEVEMENTS

- Contributed to open-source with custom hooks library.
- Solved The Geektrust Frontend Challenge and scored a perfect 100.
- Solved 200+ problems on Leetcode, 1740 rating on codechef.

EDUCATION

- B.Tech in Computer Science,AKGEC
- 2016-2020, CGPA:7.67

PROJECTS

NetflixGpt- A movies recommendation App

technologies used:react,redux toolkit,tailwind css

- <https://github.com/hardrock1997/NetflixGPT>
- Developed a **fully responsive app** that integrates TMDB and Gpt turbo 3.5 Api,s to fetch and **suggest Movies**.
- Implemented **user authentication system with Sign In and Sign Up** functionality.
- Developed **Multi Lingual feature and form validation**.
- Leveraged Redux toolkit for the state management and Firebase for the backend services.

Video Streaming Platform

technologies used:react,tailwind css,reduxtoolkit

- <https://github.com/hardrock1997/videoStreaming/tree/main>
- Developed a **Video Streaming platform** with Youtube Api,s to fetch and display video content.Implemented the **Search feature and optimised it using debouncing and caching to reduce load time**.

Drawing Tool

technologies used:nextjs,nodejs,redux toolkit,web sockets

- <https://github.com/hardrock1997/drawingtool/tree/main/drawingtool>
- Developed an **online drawing tool** inspired by EXCALIDRAW.
- Using **Web Sockets** connection to synchronize content across multiple open tabs.
- Leveraging the **Canvas Api** to replicate the drawing on the Viewport.
- Users can **download redo and undo their created content**.
