Education

NIT Jamshedpur

Bachelor of Technology in **Computer Science and Engineering**
CGPA: 8.18 / 10.00

2017 - 2021

Jamshedpur, Jharkhand

Experience

ALLEN Digital

Software Engineer 2

July 2023 – Present

Bengaluru, Karnataka

- **Built Improvement Book Microservice**
 - Designed and developed this **microservice from scratch** to serve as a central component for frontend and multiple upstream services.
 - Improvement Book aggregate and analyze student mistakes from tests, homework, and quizzes, enabling targeted learning and performance improvement for student.
 - This microservice handles **5.5 million requests per day** with a **P99 latency < 500 ms**.
- **Built Test-Taking Platform Ecosystem**
 - Utilized **Temporal workflows** to manage **complex, long-running processes**, for handling life cycle of student tests, homework assignments, and personalized practice.
 - Took ownership of resolving data issues within the Improvement Book feature, developing a unified approach to address data inconsistencies across multiple test categories, backfilling data for over **300 million documents**, and directly impacting **450,000+ students**.
- **Building the Homework Platform**
 - Owns the Homework service, facilitating the creation of over **10,000+ homework assignments per week**, with a reach of **300,000+ students**.
 - Worked extensively on both student and teacher APIs, providing tailored features for different user needs.

TEKION Corp.

Software Engineer

June 2021 – July 2023

Bengaluru, Karnataka

- Developed and maintained **comprehensive reports** for parts transactions, warehouse management, and service-parts transactions, enabling efficient tracking and accounting for dealerships.
- Developed **auto-resolving** features for parts based on name, vehicle brand, and OEM, streamlining dealership workload.
- Implemented **dynamic pricing calculations** using various design patterns and automate various flow of **Parts Purchase order**.
- Led an effort to improve code quality and fix vulnerabilities. Using **Java, SpringBoot, MySql, Kafka** as tech stack.

OYO

Software Engineer Intern

January 2021 – May 2021

Gurugram, Haryana

- Developed a web-based internal tool that allowed the product and business teams to create, manage, and analyze promotional campaigns on the app.
- Improved the existing logging system to provide more detailed and actionable logs.
- Increased test coverage from 30% to 90% and reducing post-release issues.

Projects

HackerNews Clone

- News application that deals with the news of people with their source.
- Includes features like filter by date, jwt Authentication, Login, Signup, like, comment, report, edit your post/news, database management by admin.
- Build using SpringBoot, ReactJS, MySql

Technical Skills

Languages: Go, Java, C, C++, Javascript

Technologies: Go-Kratos, Spring Boot, React.js

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, API, Database Normalization
