Experience

Chamberlain Group, Pune

Jul 2025 – Present

Software Engineer III

- **PDP Bottom Navigation:** Enhanced user experience in the **MyQ** app by validating and optimizing the Shop tab's Product Detail Page(PDP) and bottom navigation (Home, History, Discover, Shop, Menu), increasing **15%** of in-app engagement.
- **CDUI:** Led feature implementation in the **Config-Driven UI** (CDUI) framework, streamlining UI updates and reducing development turnaround time by **25%**.
- **MegaChips:** Developed and integrated **MegaChips** on the Home screen for subscription states (**Free Trial, Retrial**), improving user visibility into account status and driving a **12%** uplift in subscription conversions.

Samsung R&D Institute, Noida

Jul 2022 – July 2025

RnD Engineer

- **Multilingual Phone Settings Search:** Led the development of a Multilingual Phone Settings Search feature using **Java** and **Kotlin**, enhancing accessibility for **100M+** global users by enabling seamless search across **10+** languages, improving search accuracy by **30%** and reducing query response time by **40%**.
- **Dynamic Status Bar:** Implemented a context-aware **Dynamic Status Bar** for Samsung, integrating personalized icons, Call Chip, Activity Chip, and **Expanded Card**, enhancing **UI** flexibility and increasing user engagement by **25%**.
- **Charging Status Chip:** Integrated the **Charging Status Chip** within **ONEUI 7.0** utilizing **Spring, AndroidX** animations solely using **MVVM** architecture resulting in a **40%** improvement in the real-time charging **UI** experience for users.

Samsung R&D Institute, Noida

Feb 2022 – Jun 2022

RnD Intern

- **AOSP Customization:** Customized and improved the **Android Open Source Project** for **Samsung** devices, achieving faster **processing speeds**, reducing system **resource consumption** by almost **70%** with smooth operations.

Projects

Plank Tool

- Programmed an **automation** tool in **Kotlin** and **Java** using **UI Automator** to detect **memory leaks** executing repeated test cases, improving test coverage by **60%**.
- Deployed the tool on **Sherlock** testing platform enabling **95%** faster **SA logging** and seamless multi-device execution and accelerating execution efficiency across multiple device models.
- Streamlined **debugging** for memory management issues, reducing manual testing efforts by **50%** and ensuring seamless cross-device automation.

Health Fitness App

- Accustomed **Firestore Authentication** for easy sign-up and login facilitating a **75%** increase in successful user onboarding.
- Allowed users to log workouts manually. Implemented a food diary feature using **Room database** to track meals and scheduled reminders using **Alarm Manager** and organized code using **MVVM** pattern to separate **UI** and **business logic**.
- Merged the **Google Fit API** for tracking fitness activities and used **Jetpack Compose** for a designing declarative **UI** and incorporated **Firestore Analytics** to track user engagement and app performance, and enhanced checkout with order creation.
- Intensified **data synchronization**, reducing **sync latency** by **40%**, leading to a **20%** increase in daily active users.

Technical Skills

- **Languages/Concepts:** Java, Kotlin, MVVM, OOPS, DSA, Kubernetes, Microservices, AOSP, MySQL, C++, React Native
- **Frameworks/Libraries:** Jetpack Compose, Room Database, Lottie, Dagger, Kotlin Coroutines, SpringBoot, REST APIs
- **Tools:** Android Studio, Perforce, VS Code, GitHub, Gerrit, CI/CD, IntelliJ IDEA, Android SDK, NDK, JIRA, CTS, Docker

Education

Bachelor of Technology in Electronics and Communication Engineering

Aug 2018 – May 2022

Birla Institute of Technology (BIT), Mesra

CGPA: 8.33/10

Extracurricular / Certifications

Construct-O-Bot (Ranked **4th** amongst **100+** teams across Asia)

AI Intermediate course (Certificate of merit)
