

VIVEK SHARMA

Software Engineer

Experienced Software Engineer with ~5 years in software development, proficient in problem-solving, with strong foundations in Data Structures and Algorithms. Skilled in developing and maintaining large-scale systems in microservices and distributed architectures.

WORK EXPERIENCE

Member of Technical Staff (SR. SDE)

MarkovML

02/2023 - Present

India

MarkovML empowers AI teams to improve data quality, evaluate models, and collaborate seamlessly to unlock the full potential of AI.

Achievements/Tasks

- One of the initial team members in core Engineering Team.
- Led end-to-end project lifecycle, from conception to production deployment, including mentorship of junior team members and ensuring timely project completion.
- Implemented various features and backend services from scratch like: notification service, event processing service, dataset relabeling store, etc.
- Executed multiple projects integrating Machine Learning algorithms and operators, using python and other ML libraries.
- Tech stack: Python, mongodb, AWS etc.

Software Engineer - 2

Sharechat

10/2021 - 02/2023

New Delhi, India

Tasks

- Working as a software engineer in core Platform team.
- Worked on high impact and high scale (> 200K RPS) services like dynamic config service etc & contributed to HLDs and LLDs of these services, actively coded and tested them, and took care of Production Releases & reduced the server cost by ~50% for few services.
- Redesigned & Owned various services like config-service and reduced cyclomatic & cognitive complexity by ~70%.
- Worked on designing the Resiliency library for the organisation wide use case from scratch.
- Tech worked on: GCP (cloud), Golang, Nodejs, Python, MySQL, GCP spanner, GCP pubsub etc.

Software Development Engineer

MindTickle

08/2019 - 09/2021

Pune, India

Achievements/Tasks

- Worked in the team, which is the owner of the domain layer infra of the system known as 'governance team'.
- Worked on **email-logs** feature for admins, which reduced the email-details specific support tickets by 100%.
- Tech : Python, Golang, Java etc.

EDUCATION

B.Tech , Information Technology

USICT

08/2015 - 06/2019

CGPA : 8.2/10.0

TECHNICAL SKILLS

go

java

Python

mysql

nosql

git/github

mongodb

data structures

kubernetes

graphql

MAJOR PROJECTS

Workflows (01/2024 - Present)

- Workflows enable you to run automated multi-stage operations on your data.
- Involved in ideation, design, execution and planning of workflows from scratch. Delivered the project v1 on committed timelines.
- Tech: Python, kubeflow, airflow, mongodb, etc.

Global Config Store (04/2022 - 09/2022)

- Project was to create a centralised system to manage the applications configurations and provide the updated configs to the services in real time dynamically without additional deployment.
- Involved actively from ideation phase to implementation. Contributed in **LLD, HLD and implementation**.

Email logs (05/2021 - 08/2021)

- This feature were developed for user where they can see every email details that have been sent from the platform.
- About ~3 M emails were generated via platform on monthly basis.
- Tech used: go, cdc events (couchbase), mysql, lambda, aws SES, aws S3 etc.

Bulk operations and System Feedback (08/2020 - 11/2020)

Event Processor (03/2020 - 07/2020)

- Tech used: Go, mysql, Kafka consumer, RabbitMq etc.

ACHIEVEMENTS

ACM ICPC 2016 & 2018

My team was selected for ACM ICPC regional contest twice, which was held at Coimbatore, India.

Competitive Programming (handle : vivek0509)

Solved 600+ programming questions in total on various online programming platforms like Codechef, Hackerrank, Uhunt, etc.
