PROFILE SUMMARY

Performance-driven professional with nearly 5 years of experience spearheading strategic microservice development and integration. Expertise in GoLang, Docker, Kafka, Kubernetes, and monitoring tools for scalable and performant systems. Deep knowledge of Helm charts for microservice management and deployment on Kubernetes.

PROFESSIONAL SKILLS

- Golang | Python | pi(google internal language) | SQL | Git | Kafka | Linux
- Kubernetes | Docker | Elasticsearch | Microservices | Django | REST
- Postman | Rest Client | Promql | JIRA

WORK EXPERIENCE

Mavenir - Software Developer

Member of Technical Staff I

May'19-Jul'20

Jul'20-Jul'21, Bangalore

Mavenir Telecommunication Cloud Integration Layer(MTCIL)/Mavenir Webscale Platform (MWP)

- Provided technical leadership by driving the design and development of major architecture components.
- Involved in undertaking research analysis, developing new systems, leading process design, undertaking testing activities, and supervising work operations.
- Leading hardware architecture designs, highly dense system integration efforts and module.
- Worked as a part of **MTCIL** Dev team working on R&D project which is a **monitoring and management tool**.
- Developed application as multiple microservices in a k8s platform. The microservices include **VESGW**, **CMaaS**(Config Management as A Service), **FMaaS**(Fault Management as A Service), **TMaaS**(Topology Management as A Service), **HAaaS**(High Availability as A service), **LMaaS**(Log Management as A Service)
- Contributed individually on **VES-Gateway** which is a service acting as a bridge between different microservices
- Worked on other critical Golang **microservices** such as **CIM** and developed Prometheus and Rest Api for this microservice.

BigBasket - Software Development Engineer 3

Jul'21-Dec'22,Bangalore

- Worked in developing the **picking-service** microservice at BigBasket during the transition from a **monolithic** to a microservice architecture. Responsible for development, deployment, performance, testing, debugging of the service which in term helped in **scalability**, reliability,

flexibility as software updates can be performed more frequently with improved reliability, uptime, and performance.

- Contributed in **BB-now** project which was related to instant delivery using Dunzo with no route info or using existing routing svc and sending order to e-retails svc where it follows the regular delivery.
- Designed, deployed and contributed for picking platform on various levels which was the new service developed in Golang. It was migrated from monolithic to microservice which checks the order status and picking status using api calls to communicate to **picking svc, order svc, warehouse svc** and updating the status in wapidownload table which is further used at the time of picking.
- Implemented integrated systems using a wide variety of protocols like REST, JSON and others.

HCL - Client Google

Jun'23 - Jan'24, Bangalore

Google cloud privacy CPOE TOOLING

- Concord Service Integration: Spearheaded the seamless integration of the **Concord service** into the existing privacy check mechanism. This involved meticulous planning, collaboration with **cross-functional teams**, and ensuring alignment with project objectives and timelines.
- Feature Development: Led the development efforts for implementing new features aimed at enhancing the **Google Cloud Privacy Assessments**. This included requirements analysis, design discussions, coding, testing, and deployment of feature updates to meet evolving business needs and compliance standards.
- Bug Fix and Maintenance: Played a pivotal role in identifying and resolving issues within the existing code repository, ensuring optimal performance and reliability of the tooling platform. This encompassed **proactive monitoring, troubleshooting, and applying corrective measures** to address any instances of system anomalies or discrepancies.

Additional Contributions:

- Eldar Service: Collaborated on the development and enhancement of the **Eldar service**, contributing insights and expertise to optimize its functionality and effectiveness within the broader privacy tooling ecosystem.
- Turbolaunch and Ariane: Provided support and technical guidance on the **Turbolaunch** and **Ariane projects**, leveraging domain knowledge and best practices to drive innovation and efficiency in project deliverables.
- Migration to Concord: Facilitated the smooth transition from the **legacy linter service** to the **Concord platform**, leveraging Concord's advanced assessment capabilities to streamline and enhance privacy tooling processes.

By actively engaging in these initiatives, I contributed to the advancement of Google Cloud's privacy compliance objectives and reinforced my expertise in developing robust, scalable, and secure tooling solutions within complex cloud environments.

EDUCATION

B.E (Information Technology) – Madhav Institute of Technology & Science, Gwalior	2018
XII (PCM) – C.B.S.E Shri Vardhman Higher Secondary School, Ashoknagar (M.P)	2014
X – C.B.S.E Tara Sadan Higher Secondary School, Ashoknagar (M.P.)	2011
