OVERVIEW

Software Engineer with 6+ years of experience developing web, cross-platform mobile, and blockchain applications. Skilled in the end-to-end software lifecycle, including design, development, testing, deployment, and maintenance; across both enterprise and consumer domains.

EXPERIENCE

■ FOUNDING ENGINEER

Component.Fi || Nov 2022 - July 2024

- Led the frontend development of “Blueprint”, a simulation platform for DeFi trading strategies built with NEXT.js.
- Designed, developed, and deployed a custom web-based IDE, providing crypto traders with a full-fledged Python environment.
- Integrated REST/gRPC microservices and Ethereum smart contracts to simulate and analyze user-coded trading strategies.
- Implemented interactive data visualizations using charting libraries (Charts/D3) to display simulation results.
- Wrote unit and end-to-end tests using Jest and Cypress.
- Optimized frontend performance and responsiveness to ensure a seamless user experience.
- Collaborated with backend and blockchain teams to streamline data flow and enhance system efficiency with caching.

EDUCATION

University of London

Bachelor of Science
Computer Science (honors)

SKILLS (CORE)

TypeScript JavaScript

Node.js React APIs

React Native GraphQL

NEXT.js Jest Redux

MongoDB TailwindCSS

SKILLS (AUX)

Python Golang Linux

PostgreSQL zsh Git

Jenkins AWS Docker

Agile CI / CD Three.js

EXPERIENCE

■ SOFTWARE ENGINEER

Tripadvisor || Feb 2021 - Oct 2022

- Developed the web frontend using “Lithium”, Tripadvisor’s in-house SSR framework built on React & GraphQL.
- Worked closely with UX designers and product managers to ship features on the Vacation Rental vertical.
- Led bug-hunting and resilience testing for Tripadvisor’s child platforms, including Holiday Lettings & Flipkey.
- Contributed to product strategy through detailed reports and participation in monthly review meetings.
- Mentored junior developers, improving team performance and productivity.

■ FRONTEND ENGINEER

Yogami.Fit || July 2019 - Jan 2021

- Designed and developed multiple iterations of the core product i.e. a cross-platform mobile app built with React Native.
- Created key features on the React web frontend and later led its migration to NEXT.js & TypeScript as the codebase enlarged.
- Integrated Tapjoy for user analytics and optimized it for ideal user behavior.
- Managed web and mobile deployment pipelines using Jenkins, AWS, & Expo.
- Pushed regular bugfixes, refactored codebases for maintainability, and monitored performance with Sentry.

■ SOFTWARE ENGINEER

Whatfix || Mar 2018 - June 2019

- Designed and developed a PWA as a proof of concept to replace a major feature of the core product.
- Conducted accessibility and UX reviews for the web frontend, spearheading key improvements.
- Created unit and integration tests to support the migration of the Flask backend from Python 2 to 3.
- Implemented and delivered features across the full stack.
