

Vivek Kumar Yadav

Systems Engineer - IT Developer

📞 7001759757 ✉ vivekyadav.off@gmail.com 🔗 <https://www.linkedin.com/in/98-vivek-yadav/>
📍 Kolkata

SUMMARY

IT Backend Developer with a strong background in developing Java and Python application with TCS working for a leading pharmaceutical client. 3+ Years of industry experience includes programming, debugging, deploying and supporting applications. Learning and hands-on experience in Data Science and Machine Learning tools.

EXPERIENCE

Systems Engineer

Tata Consultancy Services 📅 2020 - Present 📍 Kolkata, W.B.

- Application Owner for 2 of domain applications (components written in **Java, Spring boot and Python Flask** with Angular as frontend and Aurora DB as Database)
- Lead 13 enhancement projects within the team
- Worked on **improving the turnaround time** of application from 9 hours to 1 hour by fine tuning the SQL scripts and creating stored procedures.
- Written **Python script** to send success/failure mails based on DB status with different HTML templates.
- Lead team of 4-5 members for migrating projects from **Subversion** repository to **GitLab**
- Handled code changes needed in application after migration from SVN to Git
- Handled **CI/CD pipelines configuration** using Jenkins and Nexus with GitLab as storage repository
- Deploying and managing images in Docker
- Writing **AWS Lambda Scripts** to load data from AWS S3 to MySQL Database.
- Point of Contact with Business to **gather requirements**, issues or suggestions to implement in future sprints, then document them and get it approved in Central Document Repository.
- Handles **security review and vulnerabilities** related to Linux servers to mitigate all issues with Common Vulnerability Scoring System (CVSS) score >7 and update system libraries
- Wrote automation scripts** for airflow Servers running on Linux to auto start the services once the servers go down by checking process details.

Intern

Infosys 📅 01/2020 - 03/2020 📍 Mysore

- General Domain: Python, SQL and Object Oriented Programming using Python.
- Stream: Data Science, Machine Learning, Concepts of Deep Learning and Natural Language Processing

SKILLS

Python	Java	C	Data Science	Machine Learning
MySQL	Gitlab	Linux Scripting	AWS Lambda	Jenkins
Nexus	Agile	MySQL Workbench	HTML/CSS	AWS EC2
Oracle SQL	Databricks	Eclipse	PyCharm	Anaconda

EDUCATION

Bachelor of Technology (CSE)

Maulana Abul Kalam Azad University of Technology

📅 2016 - 2020 📍 Kolkata, W.B.
• 9.04 DGPA

TRAINING / COURSES

Data Science Using Python

Trained on Data Science (Exploratory Data Analysis, Data Visualization and Insight Gathering) on Large Data Sets. Created a project for Loan Data Analysis to gather insights and trend which is followed by the data.

PROJECTS

Human voice recognition system in Hindi Language using Deep Learning

📅 11/2019 - 06/2020 📍 Kolaghat

Deep learning module to predict on spot vocal word out of 6 different phones ('Aage', 'Piche', 'Daye', 'Baye', 'Ruko', 'Chalo')

- Human voices from people of different age groups and gender were collected and fed to Deep Learning model to train it.
- The system was able to predict on spot voices with an accuracy of 88-92%.
- The system can be used to feed into toy vehicles to control it through voice.

ACHIEVEMENTS

Received TCS internal beyond performance award twice for timely delivery and effort

Received Contextual Master Award for creating improvements in running process

Received Special Initiative Award for taking initiative and creating automation

Received Applause Award for service and commitment
