vivek.chitriv2019@gmail.com

Summary

Creative back-End Developer with close to 4 years of experience leveraging Java Spring boot with microservices to create banking spring based application. I seek to secure the position of Back-End Developer. I hope to share my skills, expertise and experience with your team and valuable clients.

Experience

Accenture Solutions Pvt Ltd | India, Pune

Senior Software Developer | 07/2024

Guide Me App - Web Application for Financial Agents

- Project Domain: Finance
- Developed a web application, *Guide Me*, to assist financial agents in offering financial products online by capturing customer details and providing tailored recommendations.
- Tools & Technologies: Java, Spring Boot, Rest API, Kibana, SQL, NoSQL, Git, Jira

Bajaj Finserv Direct Limited(Bajaj Market) | Maharastra, Pune

Senior Software Engineer | 11/2023 - 07/2024

Integrated Chatbot Solution for Financial Services Customer Center

- Architected and implemented tailored chatbot solutions leveraging distinct technology stacks to meet the unique requirements of each financial service domain.
- Engineered backend systems using Spring Boot and Python Django Frameworks, ensuring robustness, scalability, and seamless integration across the platform.
- Integrated Langchain Framework for advanced natural language processing NLP capabilities, empowering the chatbots to understand and respond intelligently to customer queries and requests.
- Implemented MongoDB and Chroma vector store for efficient data storage and retrieval, optimizing performance and scalability of the chatbot system.
- Orchestrated deployment on cloud platforms such as AWS Bedrock, Microsoft Azure, and leveraged OpenAI for language model capabilities, harnessing the power of cloud computing and AI to deliver a reliable and scalable solution.
- Collaborated closely with cross-functional teams to gather requirements, define project scope, and ensure alignment with business objectives and regulatory compliance.
- Led the exploration and integration of state-of-the-art LLM (Large Language Model) models for enhanced conversational capabilities and personalized customer interactions.

Bajaj Finserv Direct Limited(Bajaj Market) | Maharastra, Pune

Senior Software Engineer | 07/2022 - 10/2023

AMBIT Credit Journey: End-to-End Development with Java Stack

- Spearheaded the development and implementation of the end-to-end Ambit Credit Journey project, leveraging cutting-edge technologies and best practices.
- Designed and developed Spring Boot microservices architecture to facilitate seamless communication and integration between various components of the Ambit Credit Journey system.
- Utilized JPA (Java Persistence API) for efficient and scalable data access and management, ensuring optimal performance and reliability.
- Implemented automation tools such as Postgres, MongoDB, Terraform, and Docker to streamline deployment processes and enhance system scalability and maintainability.
- Orchestrated deployment services using a YAML-based approach, ensuring consistency and reliability in the deployment process across different environments.
- Collaborated closely with cross-functional teams to gather requirements, define project scope, and ensure alignment with business objectives and technical requirements.
- Conducted regular code reviews, performance optimizations, and troubleshooting activities to identify and address potential issues and improve overall system performance.

Bajaj Finserv Direct Limited(Bajaj Market) | Maharastra, Pune
Software Development Engineer 2 | 03/2021 - 06/2022

- **Secure Integration and Personalization Suite: A Microservices Approach**
- Building a Robust Authentication and User Management System with Spring Boot in a Microservices Architecture.
- Integration of payment domain services, facilitating seamless and secure transactions for customers, and ensuring compliance with industry regulations and security standards.
- Played a key role in the implementation of Personalization and Computing Services, leveraging advanced algorithms and data analytics to deliver personalized user experiences and optimize service performance.
- Led the design and implementation of a Search Service using Elasticsearch, enabling fast and accurate retrieval of information across large datasets, enhancing user satisfaction and productivity.
- Demonstrated proficiency in AWS Lambda, AWS SQS, and SNS, utilizing serverless computing and messaging services to enhance scalability, reliability, and performance of distributed systems.
- Collaborated closely with cross-functional teams to gather requirements, design solutions, and ensure alignment with business objectives and technical requirements.

Skills

Programming Languages, Java Python, Framework, Spring Boot. Spring Framework, Hibernate Junit and Mockito, Django, Architectural Style, REST Microservices, Distributed Logging ELK, Databases, RDBMSPostgress MySQL Oracle), NoSQLMongoDB, Software Development Style, Agile Software Development(JIRA), Cloud, AWS SQS AWS SNS, AWS Lambda AWS Bedrock, AWS Elastic Search AWS S3, AWS Cloud Watch, Version Control, Git(Gitlab, BitBucket)

Education

SunBeam Institute of Information Technology | Karad, Maharastra
Advanced Computing | 02/2021

Rashtrasant Tukadoji Maharaj Nagpur University | Bhandara, Maharastra
Computer Engineering | 06/2018

Government Polytechnic Gondia | Gondia
Diploma in Engineering | 06/2014
