

VIVEK RAJ

Gurgaon, India, Contact- 9310116815, raj.vivek31@gmail.com

Professional Summary:

IT professional with 9+ years of experience in **Windows Server Administration, Active Directory, VMware, and AWS Cloud**. Expertise in **Active Directory (AD), Group Policy, DFSR, DNS, DHCP, SCCM**. Skilled in **troubleshooting, automation, and cloud infrastructure** with a strong focus on security and high availability. AWS Solutions Architect Certified with a proven track record of delivering enterprise IT solutions.

WORK EXPERIENCE:

Incedo INC Technology Pvt Ltd
Designation: Senior Administrator
Project Name- Cetera & Assetmark
March-2021 to January 2025

Technical Skills:

- **Operating Systems:** Windows Server (2012/2016/2019)
- **Directory Services:** Active Directory (Group Policy, AD Replication, DFSR, Kerberos Authentication)
- **Infrastructure Services:** DNS, DHCP, SCCM (Patching & Software Deployment), PowerShell Scripting
- **Cloud Platforms:** AWS (EC2, S3, IAM, RDS, CloudFormation, Auto Scaling), Azure Infrastructure, Entra ID
- **Virtualization:** VMware vSphere, ESXi, vCenter, Hyper-V
- **Security & Compliance:** IAM, Security Hardening, Backup & Disaster Recovery
- **Automation & Monitoring:** PowerShell, AWS CloudWatch, Log Analytics

JOB RESPONSIBILITIES:

Technical Expertise & Infrastructure Management:

- Provided **L2 support** for **Windows Server** and **AWS infrastructure**, ensuring high availability, reliability, and performance.
- Manage **Active Directory, Group Policy, DFSR, DNS, and DHCP**, performing advanced troubleshooting.
- Implemented and maintained **server monitoring tools** to enable proactive management of infrastructure.
- Managed **Active Directory**, including user/group administration, **Group Policy**, and security configurations.
- Configured and maintained **DNS, DHCP, and WINS** for seamless network operations.
- Deployed and supported **Microsoft Exchange Server**, including installation, configuration, and troubleshooting.
- Conducted **security audits** and implemented best practices to protect corporate data and IT assets.
- Diagnosed and resolved **Windows Server** and **application-related issues** efficiently.
- Implemented and managed **virtualized environments** using **Hyper-V** and **VMware**.
- Conducted **system maintenance**, including patch management, software upgrades, and security audits.
- Monitored system performance (CPU, memory, disk, swap space) to prevent performance bottlenecks.
- Manage **SCCM** for patching, OS deployment, and software distribution across enterprise systems.

AWS Cloud Administration:

- Designed and managed **AWS VPCs**, public/private subnets, and multi-AZ deployments.
- Created and launched **EC2 instances** using AMIs of **Linux (Ubuntu, RHEL)** and **Windows**.
- Configured and maintained **CloudWatch** for infrastructure and application monitoring.
- Managed **EBS volumes**, Snapshots, and AMIs to ensure data integrity and availability.
- Monitored **AWS infrastructure** response times, service availability, backend transaction performance, and throughput using **CloudWatch**.
- Administered **AWS resource scaling** (CPU, Memory, EBS) as per business requirements.
- Deployed, managed, and monitored applications on AWS, ensuring optimal performance and availability.
- Assisted in designing **disaster recovery plans** and high-availability architectures.

Strategic IT Service Management & Incident Management:

- Experienced in handling IT incidents efficiently to minimize downtime and ensure business continuity.
- Handled **incident management, root cause analysis**, and performance tuning.
- Skilled in troubleshooting and resolving critical issues related to Windows Server, AWS, and VMware environments.
- Proficient in using ITIL-based ticketing systems (ServiceNow, BMC Remedy) for incident tracking and resolution.
- Strong coordination with cross-functional teams, vendors, and stakeholders for issue resolution and root cause analysis.
- Ability to prioritize and escalate incidents as per SLA requirements to meet organizational standards.
- Experience in creating and maintaining incident reports, documenting root causes, and implementing preventive measures.

Service Desk & Collaboration:

- Provided technical guidance and mentorship to junior team members, fostering knowledge sharing and professional development.
- Collaborated with **cross-functional teams** to troubleshoot and resolve complex technical issues.
- Documented **support processes, troubleshooting steps, and system configurations** to improve operational efficiency.
- Maintained SOPs for known errors and shared resolutions with the team.
- Worked on ITSM tools like **ServiceNow** and **JIRA** for incident, problem, and change management.
- Monitored alerts using **ScienceLogic** and other monitoring tools to ensure proactive issue resolution.
