

Vivek Singh

Senior Software Engineer

EDUCATION

B.Tech in Information Science	Aug '10 - Jun '14
BMS COLLEGE OF ENGINEERING	Karnataka,India
• GPA: 8.45/10	

PROFESSIONAL EXPERIENCE

Entrepreneurship	Dec '17 - Sep '23
Patliputra Software Services	Patna

- Over the past six years, I've successfully spearheaded a CRM startup that specializes in developing conversational channel products similar to Juhu. These products enable brands to establish a strong presence on popular social media platforms.
- Managed and cultivated relationships with over 15 clients, understanding their unique business needs, and providing tailored solutions. This experience has allowed me to gain extensive exposure in the field of CRM and customer engagement.
- Led the design, development, and deployment of conversational channel products that help brands effectively run campaigns on various social media platforms. These solutions have empowered clients to boost customer engagement, drive brand awareness, and enhance customer satisfaction.
- Proficient in Java programming, I've leveraged this language to create robust, scalable, and efficient software solutions. My Java skills have been instrumental in delivering high-performance products for our clients.
- Possess deep knowledge and experience in .NET framework, enabling the development of feature-rich, cross-platform applications. These technologies have been essential in building and maintaining the core components of our conversational channel products.
- Thrive on solving complex technical and business challenges. My ability to identify issues, devise creative solutions, and implement them effectively has contributed to the success of our startup.
- Managed and mentored a team of skilled developers and designers, fostering a collaborative environment and ensuring the timely delivery of high-quality software products.
- Developed and executed business strategies, from product development to marketing and sales, resulting in consistent growth and profitability for the startup.
- In a fast-paced industry, I've demonstrated the ability to adapt to evolving technologies, market trends, and customer preferences, ensuring our products remain competitive and innovative.
- Continuously stay updated with the latest industry trends, tools, and methodologies to maintain a competitive edge in the CRM and conversational channel product field.

Senior Software Engineer	Dec '15 - Jun '17
Developer	Bangalore

WCCoE MPAO Notification

- This application orchestrates Multi-Product Application Operation (MPAO), managing steps like credit bureau check, client profile creation, AML updates, account setup, card activation, instant credit card adjudication, fraud alerts, client notifications, fulfillment options, micro deposit generation, verification, and eForms creation.
- Developing scalable web applications using JavaScript, HTML, and CSS .
- Collaborating with cross-functional teams to develop RESTful APIs for improving data exchange.

eCL3 Migration

- The application was initially developed using the eCL framework library, specifically eCL2, which encompasses common web service components for all services. However, it has been identified that the project needs to migrate to the latest framework version, incorporating EJB 3.0 support, resolving Message Queue issues, and implementing various bug fixes.
- Conducting code reviews & testing to ensure high-quality software deliverables and reduce post-release bugs & issues.
