P: 91-6375352588

A: Bengaluru (KA), India

SKILLS

Project & Program Management	Process Risk Management	Lean Six Sigma Black Belt
Project Documentation & SOP creation	Quality Control & Assurance	Statistical Data Analysis
Planning, Scheduling & Resource Management	Data Visualization	Business Analytics

EDUCATION

ICFAI Hyderabad

02/2018 | **MBA:** Finance & Operations

Rajasthan Technical University

04/2015 | **B Tech:** Computer Science

WORK HISTORY

Amazon - Product Compliance - Technical Program Manager II (Risk Management)

Bengaluru • 12/2022 – Current

Risk, Compliance & Governance for ML classification models

- Develop risk management strategy to oversee five ML/LLM based classification models
- Establish Andon Chord for visual risk signaling when model performs below accuracy threshold
- Establish model governance framework to control/improve pre- & post launch accuracy
- Track Precision, Recall & F1 score; conduct Root Cause Analysis (RCA) & drive Corrective and Preventive Actions (CAPA)
- Provide inputs to ML team for model retraining on correct data set

Escalation Management- Internal & External

- Develop a standardized Escalation Management Framework (EMF) to manage CEO/JeffB level escalations for Product Compliance - WW teams (1500+ users)
- Execute incident and problem management for risk mitigation and prevention.
- Define & track critical metrics (repeat escalation, defects, efficacy) to gauge EMF impact
- Launch weekly reporting and governance meetings with leadership teams; strategize escalation reduction using tech & non-tech solutions

Digitalization of manual QC processes-

- Partner with Quality, Operations & Tech team to strategize digitalization of 200+ manual quality check (QC) processes
- Develop a Risk Prioritization Framework (RPF) for identifying critical QC processes
- Drive requirement gathering & create Business Requirement Document (BRD) for Tech Partner to develop a QC tool
- Conduct tool UAT and training for Quality team, and drive WW launch for 500+ users
- Gather VOC for continuous improvement. Evaluate Quality and Productivity metrics' impact over a two-month control phase

Amazon - Product Compliance – Quality Manager

Bengaluru • 09/2021 – 11/2022

- Lead execution of QA strategy for global product compliance Quality-Operations team of ~350 members
- Establish & operationalize defect management close looping framework, right from identification to catalog correction
- Collaborate with Operations team to perform RCA for defects, identify Corrective & Preventive Actions. Established a CAPA efficacy framework for continuous monitoring & improvement
- Revise and disseminate quality documentation/SOPs to apply insights gained from quality issues

ACCOMPLISHMENTS

- ✓ 30+ Projects completed generating >\$200,000K+ monetary savings
- ✓ 10+ Awards for completed projects
- ✓ Won Gold Award at ASQ (American Society for Quality) International- 2021
- ✓ 2nd Runner-up at Qualtech Awards-2019

LANDMARK PROJECTS

Amazon-

- ✓ **Quality Improvement** - Improved Amazon catalog health (~100M listed products) by 10% accounting to 40M GV's (Glance Views)
- ✓ **Productivity Improvement** – Digitalization of 200+ manual Quality Check processes, thereby improving productivity of 500+ users by 30% across all WW teams
- ✓ **Process Excellence** - Implemented Decision Tree tool for SOP based-processes and reduced human defects by 90%

eClerx-

- ✓ Created central project tracking tool for client, generating revenue of ~ \$ 40K
- ✓ Automated identification & rectification of broken website links and saved ~ \$100K for client
- ✓ Automated processing of offlinePOs saving ~ \$ 36K for client

- Spearhead defect elimination projects by collaborating with Tech, Operations and Business stakeholders

eClerx – Process Excellence Manager

Navi Mumbai • 03/2019 – 05/2021

- Apply DMAIC, Kaizen, and Continuous Improvement across the organization.
- Foster a Zero-Defect culture through quality assurance and process adherence.
- Initiate Lean/Six Sigma projects, yielding both intangible & tangible savings.
- Utilize 5 Whys Analysis and Fish Bone Analysis to identify error causes and trends.
- Execute FMEA, VSM, and Time and Motion studies; drive automation best practices, collaborating with Operations

Federal Bank – Assistant Manager

Ahmedabad • 04/2018 – 03/2019

- Manage branch banking operations and loan processing responsibilities.
- Collaborate with regional quality specialists to report defects.
- Conduct monthly regulatory audits for designated branches.
- Review audit outcomes and implement required corrective actions.
- Identify gaps in processes, products, and customer experiences; initiate improvements and ensure accurate quality documentation

Novartis – Trainee in Operations

Hyderabad • 02/2017 – 05/2017

Objective- To define Supplier Performance Measurement Model across categories & create SPM scores for those categories

Responsibilities-

- Assess organization's current state of SPM
- Utilize findings to predict SPM coverage for the upcoming year
- Compare industry-leading SPM practices and adapt them to the company's specific requirements and usage

Learning Points-

- Insights of external best practices
- Working on ARIBA to create SPM projects for each supplier
- Emerging trends in SPM
