

# VYBHAV PRASAD

Bengaluru | 7411476099 | vybhav000@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFILE

---

Data science enthusiast with a strong academic foundation and a drive to contribute to data-driven decision-making. Proficient in programming, data analysis, and machine learning concepts. Eager to apply theoretical knowledge and practical skills to real-world challenges, making a meaningful impact in the field of data science.

## SKILLS

---

- Programming Languages: Python, .NET, C, C++
- Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn
- Machine Learning Libraries: scikit-learn, TensorFlow, Keras, SciPy
- Deep Learning, Natural Language Processing
- Statistical Analysis: Hypothesis Testing, Regression Analysis
- Data Manipulation: SQL, MongoDB, Data Preprocessing
- Version Control: Git, TFS
- Project Management: JIRA
- Web Framework: Flask
- Cloud and Deployment: AWS, Azure, Docker
- Agile Methodologies

## EXPERIENCE

---

### Software Engineer I

PowerSchool India Private Limited

12/2019 - Present

- Orchestrated cross-functional collaboration to successfully develop and maintain software applications, leveraging in-depth knowledge of SDLC and industry best practices; streamlined development process, reducing time to market by 20%.
- Developed and maintained scalable ERP software solutions, demonstrating proficiency in languages such as Python, .NET and 4GL.
- Implemented highly efficient algorithms and optimized codebase, with 40% decrease in application load time and improving overall user experience for 1 million+ users.
- Conducted thorough code reviews, fostering a culture of quality and adherence to best practices; identified and resolved 200+ issues, with a 30% decrease in post-release bugs.
- Utilized version control systems (e.g., Git, TFS) and participated in Agile development methodologies.

## PROJECTS

---

### 1. Student Performance Prediction

- Built an **End-to-End machine learning model** with an objective to predict the student performance based on features like gender, ethnicity, test preparation course, exam scores etc.
- Trained the model using multiple machine learning algorithms like Linear Regression, Ridge, Random Forest, Decision Tree and Boosting techniques to determine the model with accuracy around 90%.
- Achieved an accuracy of **88% using linear regression algorithm**.
- Created a CI/CD pipeline and deployed the model using **AWS and Azure cloud** platforms.

### 2. Predict CO2 Emissions in Rwanda (Kaggle)

- Participated in **Kaggle competition** where the objective of the challenge was to create machine learning models that use open-source emissions data with around 76 independent features (from [Sentinel-5P](#) satellite observations) to **predict carbon emissions**.
- Approximately **497 unique locations** were selected from multiple areas in Rwanda, with a distribution around farmlands, cities, and power plants.
- Model training using **Random Forest and Stacked Ensemble Learning techniques**.
- Achieved RMSE score of 22.4 using Random Forest and was able to improve the score using **Stacked Ensemble learning technique with RMSE of 9.2** on train data.

## EDUCATION

---

Bachelor of Technology (Computer Science and Engineering)

Reva University, Bengaluru (04/2015-04/2019)

## CERTIFICATIONS AND ACHIEVEMENTS

### IVY Professional School

Data Science using Machine Learning, Artificial Intelligence, Deep Learning and Tableau Certification in the month of June 2020

Link: [Data Science using ML and AI](#)

### Gold Badge in SQL and Python in Hacker Rank

[Hacker Rank - Python link](#)

[Hacker Rank - SQL link](#)
