Summary — Experienced data analyst with a proven track record in the healthcare industry. Skilled in leveraging data to drive informed decision-making and optimize processes. Proficient in data management, analysis, and visualization tools such as SQL and Power BI. Experienced in working with healthcare data including claims, patient records, and operational metrics. Strong understanding of data quality management and ETL processes.

Skills

Cloud AWS- Glue, S3, Redshift
Languages Python

Database SQL, Snowflake, Data Warehousing
Analytics Tools Power-bi, Looker, ETL, Data validation

Experience

Innovaccer Analytics

Aug 2021 – Present

Data Analyst

- Collaborated with US-based medical clients to comprehend their needs and deliver tailored services accordingly.
- **Trained stakeholders** on Power BI and various levels of healthcare data layers.
- Took charge of **daily metric/KPI reporting, ensuring accurate assessment** of provider performance.
- Led Data-Driven Decision-Making: Reduced coding gaps and improved **diagnosis code capture by 35%** through analytics on claims, clinical, and billing data. Utilised SQL, PowerBI, and ETL processes in Snowflake to automate reporting and optimise reimbursement accuracy, enhancing data-driven insights and operational efficiency.
- Pioneered the development of metrics to **analyze patient-level data**, disseminating insights through Power BI-generated reports and dashboards on a sustainable basis.
- Led the validation of dashboard data quality from start to finish, **resulting in a notable 65% improvement** in dashboard visibility.
- Handled diverse **healthcare data, such as attribution(Demographics) and claims**, for US healthcare payers.
- Executed data ingestion, analytics, and dashboard enhancements as required, streamlining processes.
- Implemented end-to-end automation of dashboard data across multiple data layers.
- Performed **ETL processes** for loading and transforming data across various data layers.
- Worked on patient-level data analytics. Identified and implemented best practices and process improvements for data analysis.
- Technologies used: **SQL, Power BI with DAX, data quality analysis, and data gap analysis**. Ensure the accuracy, consistency, and integrity of data through rigorous quality checks and validation processes.
- Worked on dashboard refresh automation and different reports on daily basis.

ZS ASSOCIATES PVT LTD, Pune, INDIA

Oct 2020 – Jan 2021

BUSINESS TECHNOLOGY SOLUTION ASSOCIATE - INTERN)

- Took charge of weekly pharmacy data ingestion into the pipeline.
- Designed and implemented a standalone Data Quality Management (DQM) service, utilizing formats such as Parquet, CSV, and text files.
- Utilized AWS Glue for daily ingestion processes.
- Integrated SQL adaptive queries into Apache Spark 3.0, resulting in a 40% reduction in execution time and cost savings.
- Utilized various tools for ETL processes to load and transform data into the required formats, and also utilized Power BI for reporting dashboards.

Education

Galgotias University, Greater Noida

Bachelor of Technology Computer Science and Engineering

Minors: Computer Science

Projects

Crime Analytics Dashboard

Mar 2020

- Provides real-time visualization of crime data.
- Also integrated geotagging for geographical map visualization.
- Technology used Rshiny frameworks, Data analytics, visualization.

SOCIAL MEDIA ANALYTICS

June 2020

- Extracted into meaningful insight. - Developed the dashboard to populated the data in visual manner. -the analysis got published in Delhi NCR region.
- Analyzed the open-source social media content.
- technology used R shinny, tweepy, data-analytics and visualization.
