Travelling • Poetry • Cycling

STATEMENT

Software engineer working for a customer engagement platform. Past experience in e-commerce domain. Seeking challenging opportunities to broaden skillset.

EXPERIENCE

MOENGAGE | LEAD SOFTWARE ENGINEER

Oct 2020 - Ongoing | Bangalore

CAMPAIGNS OUTBOUND TEAM

MoEngage is an insights-led customer engagement and analytics platform. Campaigns Outbound Team sends notifications to customers at scale on different channels like Push Notifications, SMS, Web, Email etc. More than 3 billion notifications are sent daily from the platform.

- Working in push pod which is responsible for sending push notifications (iOS, Android and Web platforms) at scale.
- Lead the migration and deployment of the codebase from AWS to Azure.
- Lead the integration of a new channel to upload users to Google Ads from the Moengage platform.
- Lead the improvement of client-committed SLAs to 99.99 per cent in all regions of AWS.
- Lead the reduction of the AWS cost of the team by 20 per cent by optimizing the bottleneck in existing code and changing scaling policies in AWS.

COVIAM TECHNOLOGIES | SENIOR SOFTWARE ENGINEER

June 2018 - Oct 2020 | Bangalore

DIGITAL PRODUCTS TEAM | BLIBLI.COM

Digital Products Team handles the mobile payment platform of Blibli, one of the top e-commerce companies in Indonesia. Major responsibilities included integrating with third parties to provide new offerings for online recharges/bill payments to the customer as well as enriching the customer experience for the existing offerings.

- Integrated the Blibli system with the largest bank of Indonesia to provide the end to end facility of top-up and updating balance in e-Money cards via NFC technology.
- Contributed to the performance testing for big sales days to determine the capacity of the system and tweak the capacity accordingly.
- Was person in charge to migrate all the projects of the team to Google Cloud Platform from On-Premises.
- Designed and wrote a new microservice in spring boot 2.0 for the better experience of customers for showing and searching order history.
- Contributed to the design of a new microservice to store the product catalog information. Made code improvements after the service went to production, reducing the response time of the system by 25%.

ACHIEVEMENTS AND ACTIVITIES

- Global Finalist in the Global Student Challenge (Supply Chain Finance). Secured 5th position amongst top 20 teams from 20 countries in the Grand Finale at Zwolle, Netherlands.
- Selected in JENESYS, a student exchange programme to visit Japan.
