EDUCATION

Vardhaman College Of Engineering

Electronics And Communication Engineering
May 2021 **CGPA : 8.43**

TECHNICAL SKILLS

- Java
- SpringBoot
- Hibernate
- SQL
- API Development
- Systems Design
- Test Driven Development
- Problem-Solving
- Data Structures & Algorithms
- Microservices
- Docker
- AWS
- Kafka
- Git & Github
- MySQL
- RDBMS
- RESTful API
- Python

CERTIFICATIONS

- **Rest API**
- **Problem Solving**
- **SQL (Advanced)**
- **Software Engineer**

RECOGNITIONS

- Consistently recognized for delivering high-quality results with minimal turnaround time and unwavering commitment to excellence. Contributed significantly to strategic initiatives like Quantum Leap, earning recognition for reliability and impact. Known for inspiring dedication and fostering strong collaboration with domain partners - **Badges**
- Recognized for quickly mastering SPF and delivering commendable results. Demonstrated significant growth through impactful work on RPS, showcasing dedication and expertise. Appreciated for hard work and commitment to excellence - **Award**.

PERSONAL PROJECTS

Restaurant-Application [Code - Backend](#)
Java ,Spring Boot, Hibernate

- Customer and Admin Roles: Customers can sign up, log in, browse the menu, place orders, and log out securely. Admins manage users (CRUD operations) and view sales reports for performance monitoring.
- Performance Optimization: Implemented caching for faster menu data retrieval and multi-threading for efficient handling of concurrent tasks, enhancing performance during high traffic. MySQL ensures data consistency.

EXPERIENCE

Software Engineer | PayPal

February 2022 - Present

Server Presentation Framework

Spring Boot,Java, Hibernate, OAuth, AWS , SQL Server , Jenkins

- Developed and scaled the Server-Driven Presentation Platform, capable of handling **millions of transactions**, significantly enhancing platform robustness and scalability.
- Spearheaded the creation of rich, **personalized user experiences** with features for **personalization**, **experimentation**, and **content localization**, directly contributing to increased user engagement and satisfaction.
- Contributed to developing **three microservices**, focusing on **API design and user architecture**, ensuring smooth UI rendering and consistent user experiences across platforms.
- Employed an advanced tech stack, including **Spring Boot, Hibernate, Oracle, and Jenkins**, focusing on backend development, database management, and continuous integration/deployment.
- Identified and resolved code smells and technical debt across the codebase, ensuring adherence to clean coding practices and improving maintainability.
- Integrated SonarLint into the development workflow, enabling real-time code quality checks and significantly reducing bugs and vulnerabilities during development.

Real Time Store | PayPal

Apache Kafka, Java,Spring Boot, Redis, Microservices,Oracle

- Developed and maintained **Kafka subscriber daemons** to consume, process, and store customer attributes and segment evaluation details into RPS in near real time.
- Designed and implemented a **daemon application to add messages to Kafka queues** and efficiently send them to consumer groups based on requirements.
- Built **scalable pipelines to handle customer attributes and segment data** ingestion, ensuring reliable delivery and synchronization across microservices.

Software Engineer | Accolite Digital

July 2021 - Feb 2022

Employee Booking and Management System

Spring Boot,Java, Hibernate, OAuth, AWS , SQL Server , Jenkins

- Worked on a booking application for Accolite Digital, focusing on backend development using **Spring Boot and Hibernate**.
- Architected both **admin and user panels** with features to enforce COVID-related restrictions such as people count limits and role-based division (e.g., Directors, SWE, etc.) for company personnel.
- Ensured **scalability, robustness, and compliance** with organizational policies during the pandemic.

SDE Intern | Symphony Talent

March 2021 - May 2021

Carrer Website

HTML,CSS,JQUERY,SQL,Python

- Developed custom career websites for clients utilizing Web Development principles and WordPress, specifically with the Avada Theme.
- Employed a tech stack that included HTML, CSS, and jQuery in conjunction with WordPress.
- Engaged in Candidate Relationship Management (CRM) projects, focusing on the design and implementation of new functionalities and updates tailored to client requirements.
