A backend developer with 2 years of experience in building robust and scalable systems in growing startups

Experience

Apty

Jul 2022 – Current

Software Development Engineer

Bengaluru, Karnataka

- Developed a SCIM protocol-based **automatic user provisioning/de-provisioning system** in Golang, significantly improving enterprise user management efficiency.
- Engineered an organization-wide **Audit Trail Service** using Node.js, enabling fast logging and easy export of user actions, thereby enhancing audit compliance.
- Implemented a **feature-level tracking system** within Apty using queries, loggers, and SumoLogic facilitating strategic management decisions through comprehensive analytics.
- Spearheaded the development of an **in-house feature-flagging tool**, effectively reducing operational costs by eliminating the need for third-party software.
- Led the design and implementation of a content **import/export** feature for Apty, optimizing content management and significantly reducing client workload across different environments.
- Developed an **export content analytics** feature capable of efficiently processing up to 50 GB of data using Elastic Search queries, significantly improving data handling and analysis.
- Built **Authentication system** for all the organisation-wide open APIs.
- Designed and implemented a **GitHub Action for automating blocking** the release cut branches, incorporating workflow scripting, job orchestration, and artifact management, enhancing project deployment efficiency and reliability
- Developed an **ingestor tool** for transferring backup data to S3, supporting the new analytics pipeline with optimized data storage and accessibility.
- **Implemented migration tools to facilitate seamless transition from version 3.X to 4.X**, ensuring compatibility and minimizing downtime during upgrades.

Tata 1mg

Dec 2021 - Mar 2022

Software Engineer Intern

Remote

- Worked with the Cart Flow and Validation Team.
- Worked on building the optimized code for showing the Expected time of delivery..
- Optimised the notification system of the backend team by improving the code for the medicines in the cart that do not have substitutes.

Education

Army Institute of Technology

June 2022

Bachelor of Engineering Information Technology (CGPA 9.20 / 10.00)

Pune, Maharashtra

St. Thomas School

June 2017

Senior Secondary School (Percentage 94.60)

Mandsaur, Madhya Pradesh

St. Thomas School

June 2015

Secondary School (CGPA 9.40/10.00)

Mandsaur, Madhya Pradesh

Hackathons

COPILOT - Engineered an advanced proprietary AI Language Model for enterprise applications, integrating sophisticated connectors for comprehensive training from diverse sources such as databases, documents, and web crawls.

Technical Skills

Languages: Typescript, Javascript, C++, Golang, Python, C

Technologies: Node.js, Express.js, AWS, React.js, Flask, Elastic Search, Github Actions, Docker, Lambda, Cron, Sumo Logic, GenAI, LLM

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Agile Methodology, Cloud Computing
