

VISHWAJEET SINGH

Meerut, Uttar Pradesh, +91 8007306466
vishwajeetsinghaf@gmail.com

Ambitious and self-motivated individual with a professional experience of 6 years in Software development. Seeking for a Developer position in a fast growing organization to utilize my expertise in software development and testing, as well as deployment and support using agile development methodologies. Can quickly fulfill short-term objectives and contribute towards long-term vision. Currently looking for challenging and paced environment that will allow me to implement Technical skills and work in a collaborative manner.

WORK EXPERIENCE

[AMDOCS]

SOFTWARE ENGINEER

PUNE

[03/2017 – 01/2022]

- Worked with a team of developers to analyze project requirements and add functionality to existing C++ application and SQL database, such as reading in claims in different formats from different sources, checking for errors, and converting them into a standard format.
- Reading existing source code in C++ to determine current programming logic.
- Working with SQL database including making enhancements to stored procedures.
- Strong problem solving, analytical and object-oriented programming skills.
- Good implementation of Design patterns in old regime codes.
- Experience developing and maintaining an application code.
- Basic experience in network/systems programming using C++.
- Analyzes technical and functional requirements and translate them into software solutions. Understand dependencies toward other systems and teams.
- Supports the delivered software and being part of a 'Center of Expertise' problem solving team.

[McAfee]

SOFTWARE DEVELOPER

BANGALORE

[02/2022 – 03/2023]

- Developed product as part of team for traffic passing through secure tunnel between client and cloud.
- DPI - packet filtering that locates, identifies, classifies and reroutes or blocks packets with specific data by examining only packet headers.
- Work as a product client team developer on a variety of platforms including Windows, UNIX and Linux distribution using C++ and Jenkins.
- Developed various networking protocol detection techniques by capturing pcaps.
- Did unit testing for existing interfaces.
- Developed cloud security features of a product end to end cloud and client connectivity.

- Provides technical assistance to colleagues and assist in resolving problems reported by other team members. Develop and maintain technical documentation.

[INFOSYS]
CONSULTANT

GURGAON
[04/2023 – Present]

- Working on the backend development of mobile applications and Web applications.
- Maintain code and develop logic for handling the data using Xcode for ios applications.
- Works independently on developing new features for ios applications for delivering accurate data to the team working on fields.

PROFESSIONAL SKILLS

- 6 years of IT experience in Analysis, Application Development, Maintenance.
- Developed SaaS product, being an individual supporter for the team.
- Work with QA team on new features testing and bug fixing.
- C++ Multithreading Development.
- Good hands on for C++ on Linux & Windows platforms.
- Good understanding of networking, tunneling concepts, implementation exposure of wireguard tunnels and p-cap captures and examinations.
- Effective in leading applications with end - to-end responsibilities using C++ and Client/Server Technologies with exposure to Telecom domain especially invoicing.
- Knowledge of advanced level programming in C++ including STLs, threading concepts and design patterns.
- Strong performance-oriented programming skills.
- Good coding skills, knowledge of OOPs and design patterns.
- Analyzes support cases and, when appropriate, provide solutions following the established case management processes.
- Strong communication skills (fluent in English, both written and spoken).
- Defines and drives best engineering practices within the organization.
- Provides mentorship to other engineers on the team or in the company.
- Facilitates collaboration between engineers, product managers, and designers.
- Prepares low-level detail design document from Functional spec document.
- Good understanding of various software development models like Agile, Waterfall.
- Network & TCP/IP Socket Programming basic knowledge.
- Windows API and x86/x64 Assembly basic knowledge.
- Basic knowledge and fine understanding of implementing multi-processing, concurrency.
- Excellent communication, critical thinking and relationship management skills, with an ability to naturally influence others and sell ideas effectively.
- Familiar with the most important operating systems: Windows & Linux.
- Can work extra hours and meet deadlines.
- Emphasize myself in learning basics of new technology to grasp more in less time.
- Dedicatedly learning new technologies to compete with gradually changing technical generation.

- Involved in some projects like designing, developing middleware components and Desktop/GUI applications for software in C++ using STL, multi-threading, data structures and IPC (TCP/IP socket programming).
- Basic idea of C++ Thread-Pools.
- Experience in all phases of software development life cycle i.e. requirement gathering, requirement analysis, design, define test cases, development, unit test and maintenance.
- Capable of meeting tight deadlines with excellent overall project and product development life cycle experience and team spirit.
- Experience in coordinating and implementing the activities planned with the Onsite/Offshore Development teams and Delivering within the stipulated time.

TECHNICAL SKILLS

- Languages: C++, Shell-scripting, Python
- Build Tools: cmake, make, Docker, Jenkins, Maven
- VPNs: Wireguard
- DPI - Pcap analyzing ability of several types of networking handshakes.
- Testing Frameworks: Manual testing, Load Test using IBM
- Database Servers: Oracle 10g/9i, Teradata, MongoDB, MS Access
- IDEs: VisualStudio, XCode, Eclipse, Codelite, Codeblocks, Shell
- Database Tools: Toad, PL/SQL, RDBMS
- Platforms: Windows 98, 2000, 2003, 7, 8.1, 10, Linux, MAC and Ubuntu
- Misc. Tools: Edit plus 3, Notepad, Notepad++
- Web Servers: Apache Tomcat 5.5/6.0
- Application Servers: JBoss, Weblogic, Websphere
- Client Technologies: HTML, XML

EDUCATION

PGDAC – DIPLOMA: Advanced Computing [CDAC Pune]

08/2016 - 02/2017

Bachelor's Degree (B. Tech.) in Electronics & Communication
Uttar Pradesh Technical University

2011 – 2015

INTERESTS

Listening to music, Watching Football, Online & Play station Gaming
