My operational expertise includes ITIL, SIX SIGMA, Project Management, Operations & Delivery Management, Stakeholder Management.

Education

Alliance University
PGDM - Information Systems Management - 2023

Bangalore University
BCA - Bachelor's in Computer Applications - 2014

Experience

Senior Security Analyst - Security Resilience, Performance Management (Dec 2022 - Present)

Eurofins Scientific India Pvt Ltd.

Responsibilities:

Ensuring the security and resilience of Eurofins ELE's network. This includes the prioritisation and thorough analysis of security alerts, covering various threats such as malware and cyber-attacks. The role involves leadership in the domains of Security Resilience, Vulnerability Management, and remediation, utilising tools like SPM - Bit-Sight and Vulnerability Management - Qualys. A key aspect of this position is the continuous optimisation of SPM - Bit-Sight & Qualys to enhance Security Resilience, which necessitates close collaboration with leadership to stay updated on the latest security developments and strategies. Additionally, the role plays a pivotal role in shaping the Resilience Team.

Highlights:

- Led Security Operations: Prioritised and analysed security Resilience architecture globally, addressing Vulnerability Management, Security Performance Management, Remediation, VCM across Eurofins ELE's 900 labs in 61 Countries.
- Robust Incident Response: Led comprehensive inquiries and remediation using SPM - Bit-Sight and Qualys, securing 15k IP's and 56k machines.
- Optimised Security: Continuously fine-tuned SPM - Bit-Sight & Qualys, maintaining an SPM score of 750 for optimal operations.
- Effective Stakeholder Engagement: Collaborated across Eurofins ELE's, assessing recovery capabilities, and improving relationships.
- Process Improvement: Developed processes, KPIs, and risk management protocols, enhancing overall security posture.
- Security Expertise: Proficient in evaluating controls across diverse technologies, following standards - NIST and ISO27001.
- Strategic Evolution: Shaped security resilience with Cyber Defence, Offensive Security, Threat Intelligence, and Risk Management.

Awards:

- Star Performer 2023: Celebrates my unwavering dedication, remarkable expertise, and relentless commitment towards organisation and Security Performance Management, Resilience process.

Teams Handled : Vulnerability Management, Vulnerability Governance, Security Performance Management, Resilience Team spread across Eurofins ELE's (76 member team)

Assistant Manager, Security Monitoring & Response (Aug 2021 - Dec 2022)

KPMG Global Services Pvt Ltd. (KGS)

This role is responsible for facilitating and Managing Vulnerability Governance, Compliance, Risks and remediation activities in infrastructure identified by KPMG InfoSec Team.

Constitutes Infra & App VM Teams spread across globe with 100+ member presence.

Responsibilities :

- Drive the execution of the vulnerability management program- VCM - Assist with coordinating and performing process and controls breakthroughs internally with process owners
- Partner with Stake holders, business process owners during design, modification, or streamlining of processes and controls with a focus on controls rationalisation and identifying opportunities for automation
- Manage Compliance risk/gaps till closure. report and escalate risk to Stake holders
- Establishes credibility and maintains strong working relationships with groups involved with information security matters (Legal, Internal Audit, Developer Community, Networking, Systems, etc.)
- Engages with Platform & Application teams during remediation phase to help teams to remediate risks by researching and providing the suitable solutions.
- Plays a key and influential role working with others, in groups, in cross-functional settings and with diverse stakeholders internally and externally
- Develops metrics that demonstrate current risk state, indicators of progress, and business alignment

Highlights:

Led vulnerability management program, enhancing controls and automation. Streamlined processes like Qualys-ServiceNow Sync (Automated Vulnerability Ticketing), managed compliance risks, and built strong cross-functional relationships across InfoSec Teams. Played a key role in remediation efforts, developed metrics, and established compliance reporting mechanisms(PowerBI, Custom Dashboards).

Awards:

Wall of Fame: For significant contributions to the success of the Vulnerability Management Process and GRC module.
WOW Award: Leading the Vulnerability Hyper-care module, meeting critical deadlines & providing exceptional Project Leadership, Project Management services.

Responsibilities:

- Identifying security risks, threats, and vulnerabilities across networks, systems, and applications.
- Provides technical support for key security tools, enforces security policies and procedures, and monitors daily security events using SIEM and other tools.
- Responds to security policy violations, delivers actionable threat analysis, and conducts network and application penetration tests.
- Audits user account provisioning and evaluates and implements network security products and services.
- Ensures compliance through regular review of audit trails and system logs.

Highlights:

- Strengthened IS Security Team: Assisted in developing the IS security team, ensuring adherence to NIST and ISO 27001 standards.(Team Inception)
- Policy and Procedure Documentation: Created comprehensive policy and procedure documentation for ongoing security remediation efforts.
- Advanced Vulnerability Management: Successfully implemented continuous vulnerability management using InsightVM (Rapid7) and the Security Center suite.
- Enhanced Incident Response: Developed Digital Forensics and Incident Response capabilities within the Log Rhythm SIEM, improving the organisation's incident response readiness.
- Proactive Risk Management: Conducted risk-driven monitoring, reporting, and incident response for a global organisation, proactively mitigating security risks.
- Access Audits and Remediation: Performed enterprise access audits and engineered processes or system changes for ongoing remediation efforts.
- Endpoint Security Maintenance: Maintained EDR, antivirus, reporting, and encryption for endpoints, ensuring robust security using CrowdStrike.

 ISS Engineer, Client Services Security (Apr 2019 - May 2020)
FireEye Cyber Security Pvt Ltd.

Responsibilities & Highlights:

- Conduct real-time analysis using SIEM, FireEye technologies, and security analytics tools to identify security events and false positives, including further triaging.
- Correlate and triage security events and indicators generated by monitoring tools.
- Troubleshoot GPO-related issues, providing performance support for system users and administrators while handling capacity planning for on-prem and online platforms.
- Proactively inspect, analyse, and contain threats at any endpoint using FireEye HX and EX.
- Analyse, identify, and report events based on event logs, syslog, and other sources.
- Develop complex Power Shell scripts for maintenance, management, and automation.
- Assess and communicate the impact of major incidents, engaging tech teams and notifying stakeholders, applying ITIL and ITSM frameworks.
- Perform triage and response for suspected phishing emails using email security and threat intelligence tools.
- Investigate and advise on network-related risks and vulnerabilities. Define, manage, and govern compliance processes, ensuring adherence to security policies and working with cross-functional teams.
- Create and maintain operational reports and conduct monthly audits of key performance indicators for SOC.

Awards:

Recognised globally for Q3 achievements within the application team. Led a 7-month cross-functional initiative spearheaded by the Technical Marketing team, collaborating with Marketing, ISS, Procurement, and Legal. Accomplishments encompassed the revamp of competitive battle cards for 30 leading competitors across all Solutions, development of training videos, integration of FireFight on OKTA through SSO, and the facilitation of numerous training sessions.

 Help Desk - Infrastructure Engineer (Oct 2017 - Mar 2019)
Marvell Semiconductors India Pvt Ltd.

Responsibilities & Highlights:

- Lead security projects to enhance infrastructure and company security posture.
- Managed security incidents, including major ones(P1, P2) - CSIRT (Splunk).
- Developed and reviewed company-wide security policies and processes. Set up and maintained monitoring infrastructure, incident response, and forensic toolkit.
- Published and maintained security advisories and knowledge base articles for various security programs.
- Supported code defect triage and remediation, assessing risk with CVSS.
- Implemented multi-layer cloud security practices, covering firewall, security groups, encryption, and vulnerability management.
- Documented security implementations for audit support, including ISO/IEC 27001, Privacy, Risk Management, Data Security, Business Continuity, GRC, and GDPR.

 Analyst A4 - Systems Engineer (Dec 2014 - Sep 2017)
Capgemini Technology Services India Ltd.

This position Allowed me to analyse, design, configure, deploy, test, maintain and administer Windows & Cloud infrastructure

Responsibilities:

- Managed Active Directory consolidation, Managed Mac and Windows patch cycles using SCCM and Jamf.
- Utilized ITSM and ITIL frameworks for Change Management, Incident, and Problem Management.
- Administered Windows platforms, Active Directory, GPO, MS Exchange, and O365.
- Designed SCCM work plans for Windows Desktop Images. Provided technical support for Infrastructure, Citrix Env.
- Led new project implementations and optimised server configurations. Performed system maintenance, patching, and upgrades.
- Managed Access Management Solutions and Collaboration Services while maintaining front-end IT infrastructure for reliability.

Awards:

Best Performer: Acknowledgment of exceptional performance and project contributions.

XtraMile in Business: Recognized for outstanding and enduring contributions to the IMS-Infra Project in 2016.

Star Performer: Commended for exceptional project performance and contributions.

POB Award: Honoured for displaying remarkable professionalism, dedication, and commitment to the client's business.

Software Engineering Trainee (Jun 2014 - Dec 2014)

Hyva IT Solutions Pvt Ltd.

Responsibilities:

The Role is responsible for supporting delivery and support of high quality Identity and Access Management services. Access Governance Identity Administration Privileged Identity Access Management & Federation Core Directory Services Security & Risk Intelligence Data Security & loss prevention.

Highlights: Working and implementation knowledge of various identity and access management products. Formulate and define business system design and/or technical system design. Responsible for gathering, compiling and synthesising information with regard to technology processes or systems. Create test plans, technical test cases and participate in UAT.
