

EXPERIENCE

- **Freshworks** Bangalore, India
Senior Data Scientist *Sep 2024 - Present*
 - AI Co-pilot
 - Working on similar ticket recommendation feature which reduces the mean response time for resolving similar IT Incident tickets.
- **Bosch Global Software Technologies** Bangalore, India
Data Scientist *June 2023 - Sep 2024*
 - Autonomous Driving
 - Trained object detection model based on multi-camera images for detection of dynamic objects on road.
 - Worked on improvement of object detection performance by eliminating noisy images and annotations within datasets in an automated way.
- **Synapsica Healthcare (YC W20)** Bangalore, India
Data Science - Computer vision *Feb 2019 - June 2023*
 - Spine MRI Pathology Detection–Spindle
 - Trained deep learning models for classification, object detection(YOLO), semantic segmentation(UNET), and keypoint detection tasks.
 - Optimized the existing production pipeline to enhance system flexibility and boost performance by implementing batch processing techniques, resulting in a significant reduction in processing time by **20%**.
 - Reduced the model deployment time using CI/CD pipelines, handled the server load using Kubernetes Autoscaler
 - Implemented monitoring and logging solutions to track model performance and identify potential issues in real-time.

PROJECTS

- **Product Image Generation:**
 - Implemented a pipeline for generating e-commerce products using stable diffusion. Worked on enhancement of the generated images by image inpainting technique - Demo
- **Marketing Content Compliance Report:**
 - Developed a RAG based marketing content compliance checker which takes webpage as the input, and checks if the web page is against compliance policy using LangChain toolkit.
 - Used OpenAI embedding model to create embedding and FAISS for similarity search of vectors. For implementation - [Click here](#)
- **RAG Chatbot:**
 - Implemented a RAG based chatbot which accepts PDF, web page, markdown text and provides answer based on the content. Used hybrid retrieval for better retrieval performance.
 - For implementation details - [Click here](#)

TECHNICAL SKILLS

- **ML Tools and Framework:** Pytorch, Numpy, OpenCV, Django, NLTK, Spacy, Pandas, Langchain, Scikit-learn, HuggingFace, MLflow, WanDB, DVC, Hydra.
- **Other Tools:** AWS, Docker, Kubernetes, Redis, Celery, GitLab CI/CD.
- **Languages:** Python. **Database:** MySQL, MongoDB

EDUCATION

- **Vellore Institute of Technology**
Integrated Masters in Software Engineering

Vellore, India
Jun. 2012 – May. 2017
