SUMMARY

Dedicated and innovative Lead Engineer with a proven track record of success in spearheading frontend development projects. Adept at leading cross-functional teams, driving project lifecycles from concept to delivery, and implementing cutting-edge technologies to optimize user experiences. Strong communication skills with a passion for mentorship and collaboration.

EXPERIENCE

Lead Engineer

InfoEdge India Limited

📅 Apr 2023 - Present 📍 Noida

- Leading a team of frontend developers in developing responsive, user-friendly interfaces for Naukri Premium.
- Assessed scope and requirements to assist with project design determinations for BigShyft Guide module.
- Explored and implemented AI in BigShyft products for jobseeker acquisition and engagement.
- Creating extensions and related scripts for operations team to increase their efficiency by 75%.
- Received and prioritized service requests to optimize resources.

Senior Software Engineer

InfoEdge India Limited

📅 Apr 2021 - Mar 2023 📍 Noida

- Project setups for Techminis, Techminis CMS, JobSeeker Next App from scratch and revamp of Recruiter Website.
- Worked on the optimizations of the web application like build size, web-vitals, images - preloading, prefetching and lazy loading.
- Taking initiatives for product features like OTP auto-detect in web and login using WhatsApp.
- Innovated modified progressive image loading variant for faster loading of images, enhancing user experience.
- Taking ownership of multiple projects/modules and ensuring timely task deliveries.
- Implemented best practices for code quality, performance optimization, and cross-browser compatibility, resulting in reduction in post-release issues.
- Worked with stakeholders to resolve technical issues and product grooming.
- Trained and mentored junior developers and engineers and working to improve overall team performance.
- Spearheaded the migration of legacy code base to modern frameworks, improving maintainability, scalability, and overall performance.

Software Engineer

InfoEdge India Limited

📅 Aug 2020 - Mar 2021 📍 Noida

- Developed user interface components using ReactJs concepts and workflows such as Redux and Webpack.
- Worked on jobseeker side application for building an intuitive UI for Learn module involving multiple formats of articles.
- Independently developed POCs and the entire Assessments module, taking full responsibility for its delivery.
