EDUCATION

IIT Madras

M.Tech. in Computer Science, GPA : 8/10

Chennai, India

June 2017 – May 2019

BIET Jhansi

B.Tech. in Computer Science, GPA : 70/100

Jhansi, India

May 2013 – April 2017

EXPERIENCE

Nielsen

Software Engineer III

Feb. 2025 – Present

Gurugram, India

- **Led the initiative to design and build** a proof-of-concept ETL application using **Spring Batch and Java** to modernize legacy Informatica pipelines, demonstrating a clear path to improving **observability, testability, and reliability**.
- Architected the POC solution to be **container-native (Docker)**, outlining a strategy for future **CI/CD integration**, deployment to **AWS ECS**, and **significant operational cost savings**.
- **Reduced pipeline failure resolution time by 25%** by meticulously documenting root causes and creating step-by-step remediation guides for recurring data errors.

Wayfair

Software Engineer II

Feb. 2024 – Feb. 2025

Bengaluru, India

- **Led the transition** to send-time email construction, enhancing customer engagement and **increasing click-through rates by 20%**.
- Built and **optimized REST APIs** with **multi-layered caching**, processing **1,400 requests/min** and supporting thousands of templates.
- **Engineered** an event publishing service in Spring Boot, leveraging Kafka to stream **80M messages/day** to BigQuery (GBQ) and Elasticsearch for real-time data insights.

C2FO

Software Engineer II

Aug. 2021 – Jan. 2024

Noida, India

- **Designed and implemented** the C2FO TReDS platform using **microservices architecture**, including **AWS Lambda-based services for Invoice Ingestion, Loan Management, and Payment Settlement**.
- **Developed an ETL pipeline in Golang**, integrating with GST Network, **processing 2,000+ invoices daily**, and **increasing daily revenue by \$80,000**.

Myntra

Software Engineer

July 2019 – July 2021

Bengaluru, India

- **Built the Manufacturing Order and Invoice Generation microservices** for the Product Lifecycle Management (PLM) system, **streamlining 40% of the operations**.
- Improved system efficiency and vendor satisfaction by developing a Vendor Scorecard service that **reduced order rejection rates by 30%**, and implementing distributed tracing with Zipkin to cut issue resolution time by 40%.

TECHNICAL SKILLS

Languages: Java, C/C++, SQL, Typescript, Go

Frameworks: Springboot, Dropwizard, Node.js, Spock (Unit testing), Hibernate

Developer Tools: Kafka, REST API, GraphQL, Git, Docker, Kubernetes, CI/CD, Terraform

Databases: PostgreSQL, MySQL, NoSQL, Redis, Aerospike, Elasticsearch, BigQuery, Redshift

Cloud Services: AWS, SNS, SQS, EKS, S3, Lambda, Google Cloud Platform (GCP), GCS, GKE

Monitoring: Grafana, Datadog, Kibana, PagerDuty

Project Management: Agile, Jira, Miro, Confluence

Others: Data Structures, Microservices, OOP, Scalable System Design

ACCOMPLISHMENTS

- **Received four awards at Wayfair** for technical achievement, agile project delivery, and critical on-call support, highlighting a consistent record of high-impact contributions.
- Secured **AIR 142 in GATE 2017** (Computer Science).
- **Certified in DSA and Algorithmic problem-solving** from platforms like NPTEL and AlgoExpert.io.
